Betreft: Aanvraag winningsvergunning voor koolwaterstoffen Terschelling-Noord

Excellentie,

Onder verwijzing naar de opsporingsvergunning Terschelling-Noord, door u verleend op 29 juli 2014 (uw kenmerk DGETM-EM / 12049202) en nadien aan Tulip Oil Netherlands BV overgedragen, hebben wij het genoegen u bij deze de aanvraag voor een winningsvergunning voor koolwaterstoffen voor dat gebied aan te bieden.

De vergunning wordt aangevraagd voor een periode van 20 jaar. Een volledige beschrijving van het werkprogramma en de geologische onderbouwing vindt u in de bijlage. Wij verzoeken u, deze informatie als bedrijfsvertrouwelijk te behandelen.

Na verlening van genoemde opsporingsvergunning zijn door ons activiteiten gestart die met name gericht waren op

- (1) acceptatie door de verschillende belanghebbenden om uiteindelijk te kunnen bereiken, dat tot boring(en) naar en produktie van aardgas in het gebied kan worden overgegaan en
- (2) verdere bestudering en evaluatie van beschikbare data m.b.t. het voorkomen Terschelling-Noord.

Die evaluatie heeft ons tot de conclusie en overtuiging geleid, dat het niet nodig is, een nadere evaluatieboring te doen binnen het kader van de huidige opsporingsvergunning, maar dat de economische winbaarheid van de reserves voldoende is aangetoond en derhalve direct kan worden overgegaan tot het aanvragen van een winningsvergunning voor het gebied.

Na verlening van de aangevraagde vergunning kan een aantal boringen worden gezet om daarna tot productie over te gaan. Het Field Development Plan gaat in dat verband uit van een eerste boring in de winter van 2015/2016.

Wij nemen aan u hiermede voldoende geïnformeerd te hebben en verzoeken u deze aanvraag in welwillende overweging te nemen. Voor beantwoording van eventuele vragen staan wij uiteraard tot uw beschikking.

Hoogachtend,

Tulip Oil Netherlands BV

I. Mohsen  
CEO Tulip Oil Netherlands BV

## 1 Management summary

In 2013 Tulip Oil Netherlands BV became the operator of the Terschelling-Noord, M10a and M11 licences, in the north of the Netherlands (see Figure 1). Tulip's share in the three licences is 60% and EBN is the non-operating partner holding the remaining 40%. The former licence owner, Ascent, holds an option to back-in rights for a 10% share (post EBN) at the moment of a final investment decision. The combined licence areas contain three discoveries to date: the Terschelling-Noord Field (TEN), M10-FA and M11-FA, and one prospect (Poseidon). These add up to a resource of reserves and prospective reserves.

The described development concept in this Field Development Plan is chosen on initial evaluation/screening and is used in this FDP as an option to demonstrate an economic viable development concept. The mentioned options are still subject to further detail investigation and evaluation during the MER process. The choice has been made to develop Terschelling-Noord and to leave the other discoveries for future consideration.

The volume range of the TEN Field is summarized in Table 1.

**Figure 1:** Left: Map of the Netherlands with location of Terschelling. Right: map of the licence area with the Terschelling-Noord field and its compartments.

The target interval is the Permian Rotliegend Slochteren formation. The Slochteren reservoir quality changes from the excellent aeolian sands of the Netherlands main land towards a shaler environment in the area of interest. Reservoir net pay permeabilities are in the range of 0.1-1 mD.

The technical and economic analysis as shown in the tables below shows that the project is economically sound. It is therefore recommended to proceed with drilling of a first appraisal-development well, TEN-03, to be drilled into the tail block of the Terschelling-Noord Field. This well will be drilled from an onshore location and ideally will be a sub-vertical well with a horizontal section in the reservoir. The objectives of this well are:

1. to prove the presence of hydrocarbons in the tail block and produce them;
2. to prove a common gas-water contact throughout the Terschelling-Noord Field;
3. to test and optimise drilling and completion strategy in this environment;

4. to test the reservoir quality and calibrate well productivity.

**Table 1: GIIP Summary table and compartment nomenclature as shown in Figure 1**

| Number | Compartment | P90<br>(million m <sup>3</sup> ) | P50<br>(million m <sup>3</sup> ) | P10<br>(million m <sup>3</sup> ) |
|--------|-------------|----------------------------------|----------------------------------|----------------------------------|
| 1      | Tail        | [Redacted]                       | [Redacted]                       | [Redacted]                       |
| 2      | East        | [Redacted]                       | [Redacted]                       | [Redacted]                       |
| 3      | Central     | [Redacted]                       | [Redacted]                       | [Redacted]                       |
| 4      | West        | [Redacted]                       | [Redacted]                       | [Redacted]                       |
| TOTAL  |             | [Redacted]                       | [Redacted]                       | [Redacted]                       |

After completing, testing and analysing TEN-3, if the current understanding is confirmed, then the following wells would be drilled in the subsequent drilling window:

- TEN-4 is a CO<sub>2</sub> injector and will also be drilled in the tail block. It is required because of the currently estimated 15% CO<sub>2</sub> content of the TEN Field. It is a similar well type to TEN-3.
- TEN-5 will target the central block of Terschelling-Noord as a medium-extended reach well.
- TEN-6 will target the western compartment of TEN Field. This is an extended reach well.
- TEN-7 will be placed in the central block again with a similar well type to TEN-5.

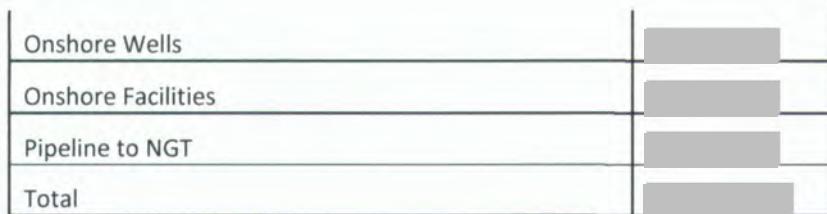

All wells will be planned and designed to allow for optional hydraulic stimulation treatments. It is not yet confirmed that hydraulic stimulation is an essential requirement to this development, but all wells will be designed and allow for this as a production enhancement technique.

The produced gas for all the wells will be routed to an onshore treatment plant and then evacuated to the offshore NGT gas line. This will require the construction of a ~40 km pipeline to reach a suitable connection point. Offshore wells will be completed with subsea manifolds and tied back with a pipeline to the onshore facilities. Base case wells, facilities and pipeline CAPEX are based on reference 5) and given in Table 2, and expected OPEX in Table 3. An indicative timing of the TEN development can be found in Table 4. Further details on development options can be found in the following chapters.

There are particularly important environmental considerations related to this development. All activities will be regulated by the strict rules of Natura-2000 because all of the onshore and some of the offshore activities are located within the protected zone. Construction and drilling will only be done during the winter season. In addition there are two other important considerations with regard to the location of drilling and production facilities, namely the preservation of sea defenses on Terschelling Island and interaction with other sea and land users. Details on the stakeholder management, environmental impact studies, and permitting can be found in later Chapters.

**Table 2: Base case FFD development CAPEX Costs and timing**

| Item | Cost |

## 2 Introduction

In 2013 Tulip Oil Netherlands BV became the operator of the TEN, M10a and M11 licences. They contain three sizeable discoveries: Terschelling-Noord (TEN), M10-FA and M11-FA. These discoveries were made in 1993, 1982 and 1977, respectively. Tulip Oil is proposing development of the Terschelling-Noord Field.

The main reservoir in the Terschelling Noord Field is the Rotliegend Slochteren formation. The Slochteren reservoir quality changes from the excellent aeolian sands of the Netherlands main land towards a shaler environment in the area of interest (reference 4). A key element of development of the poorer quality Slochteren formation in this area is the requirement of long horizontal wellbores and optional hydraulic stimulations. In addition, the presence of non-hydrocarbon gases N2 (up to 10%) and CO2 (up to 15%) add to the complexity of the development of these resources.

Modern drilling, stimulation and processing techniques will allow an economic development of these resources, and Tulip is proposing and onshore development of the Terschelling-Noord Field.

Table 6: Resources in the licence block

| Field/Prospect | Resource Classification | Gross Gas Recovery (million m <sup>3</sup> ) |     |      | Thousand BOE |     |      |
|----------------|-------------------------|--|-----|------|--------------|-----|------|
|                |                         | Low  | Mid | High | Low          | Mid | High |
| TEN-Central    | Reserves                |  |     |      |              |     |      |
| TEN-East       | Reserves                |  |     |      |              |     |      |
| TEN-West       | Reserves                |  |     |      |              |     |      |
| TEN-Tail       | Prospective             |  |     |      |              |     |      |

### 3 Health, safety and environment

#### 3.1 Health and safety

Tulip Oil's HSE Management System and Tulip Oil Life-Saving Rules apply (see Figure 2).

All employees, contractors or sub-contractors who are working for Tulip Oil have the duty and obligation to:

1. Pursue the goal of no harm to people
2. Protect the environment
3. Use material and energy efficiently
4. Respect our neighbours and contribute to the societies in which Tulip Oil operates
5. Promote a culture in which all working for Tulip Oil share this commitment.

In order to fulfil this duty and obligation, the following policy is in place:

- Tulip Oil, contractor and sub-contractor companies have a systematic and proactive approach to HSE & SP management, designed to ensure compliance with the law and to achieve continuous performance improvement.
- Tulip Oil, contractor and sub-contractor companies set targets for improvement and measures, appraise and report on performance.
- Contractor and sub-contractor companies are required to manage HSE & SP in line with the Tulip Oil HSE policy.
- Everyone working for Tulip Oil is required to stop work if an unsafe situation occurs and inform the responsible supervisor.

#### Safety and quality leadership

The behaviour of the people involved in the development project will be the most important tool to guarantee safety and quality of the work. In the case somebody identifies any issue, feels any concern regarding safety or quality of the work, or does not feel comfortable with technical and economic decisions, he or she has the right to speak up and make the situation open for discussion. This applies to the wide perspective of the development plan and is called safety and quality leadership.

HSE related to the proposed drilling activities will be described and managed via the drilling program. HSE related to the facilities and operations will be part of the engineering and execution activities.

Work with a valid Work Permit when required

Conduct gas tests when required

Do not walk under a suspended load

Do not smoke outside designated smoking areas

Verify isolation before work begins and use the specified life protecting equipment

Obtain authorisation before entering a confined space

No alcohol or drugs while working or driving

While driving, do not use your phone and do not exceed speed limits

Obtain authorisation before overriding or disabling safety critical equipment

Protect yourself against a fall when working at height

Wear your seat belt

Follow prescribed Journey Management Plan

Failure to follow the Life Saving Rules will result in corrective actions.

## The Life-Saving Rules

Figure 2: Tulip Oil Life-Saving Rules

## 3.2 Environment

The key environmental consideration regarding the onshore development activities in the Terschelling-Noord area is their proximity to the Terschelling island coast and in particular the dune area along the coast. The Waddenze, the Islands, and a coastal zone are classified as nature preservation area, NATURA-2000 (reference 1). All development activities will obviously be subject to strict regulations. Work will be carried out in accordance with binding mining and nature protection legislation which will govern and control operational activities and discharges to air and water. In addition and of particular significance, all activities on- and offshore will be in compliance with international regulations.

In the northern part of The Netherlands, gas is currently being produced from several fields in and around the Waddenze. An overview of oil and gas production sites and pipelines in the North of the Netherlands is shown in Figure 3.

The Terschelling-Noord fields are located mainly below the North Sea coastal zone, straddling the boundary of the Natura-2000 area. Apart from the Natura-2000, there are two other important considerations with regard to the locating of (temporary) drilling and production facilities, namely the preservation of sea defenses on Terschelling Island and interaction with other (sea and land) users.

The extraction of hydrocarbons can result in soil subsidence, an important issue in the Netherlands coastal defense in general, and the low lying Terschelling Island in particular. Detailed Environmental Impact studies of all activities including those potentially resulting in subsidence associated with development and production are coordinated by Royal Haskoning DHV. RHDHV is an independent and government approved consulting firm. All EIA studies will be conducted prior to any activities in the area. Adequate monitoring will be implemented to ensure this topic is given due attention.

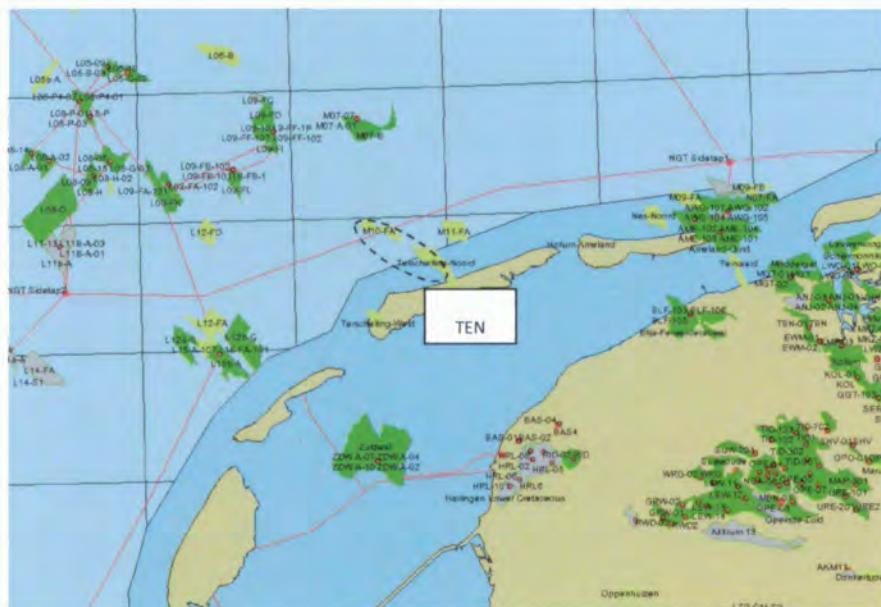

Figure 3: Gas exploitation sites and pipelines in and near the Waddenze.

### 3.3 Stakeholder engagement

#### Essentials of Tulip's stakeholder engagement program:

Position of the island of Terschelling in the sensitive Wadden Zee area

Stakeholder management: inhabitants of the Island, tourism, ministry, province, municipality, NGO's

Engagement of professional and experienced advisors

In-house expertise in relation to Waddensea aspects

Transparency of Tulip's decision making and visibility

#### Progress made to date:

"Sounding Board" of inhabitants set up with the aim to identify concerns and maximize acceptance of Tulip's plans. Relation with the Sounding Board is currently very good

Identification of permitting steps for the project identified in good consultation with the Ministry and the Municipality of Terschelling

Studies re soil subsidence/tremor and natural habitat commenced

Draft of a Covenant between Tulip and all stakeholders (approx. 80) initiated for endorsement Jan 2015

Application for Production Licence in progress, target for application is October 2014

### 3.4 Permitting

An extensive permitting process will be followed including an Environmental Impact Assessment. This EIA will be started with an initiation note indicating the high level plans of Tulip Oil to develop the Terschelling-Noord Field. In order to manage this effectively, stakeholder engagement is key to the success of this process in addition to a comprehensive but high quality EIA. For this reason Tulip Oil has contracted IMSA who has an excellent track record in stakeholder management and held multiple meetings with government bodies and NGO's to explain the project and gauge stakeholder views. A "Sounding Board" of inhabitants was set up with the aim to identify concerns and include local input in Tulip's plans.

Critical for early drilling in the 2015/2016 winter season and first production in the 2017 winter season is the possibility to take an investment decision by Tulip Oil, which will be very much driven by the EIA and other permits.

A high level development schedule indicates an early production in Q2-2017, provided that the permitting process, which is on the critical path, will be successful and will meet the target date of FID. Early engineering is required to meet the first production date for well site design, well- and facility design as well as additional permitting for drilling and facilities.

Prior to consents and approvals, an appropriate period of consultation with all key stakeholders will be honored.

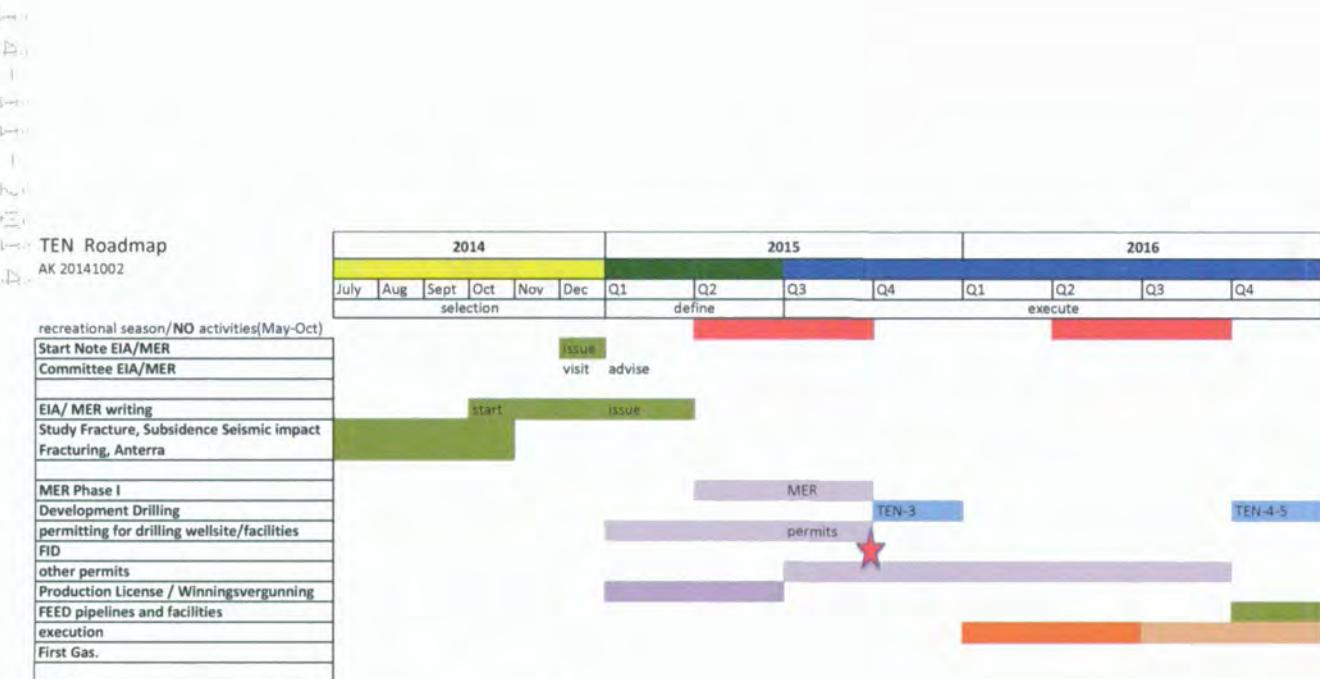

Figure 4: Development Roadmap 2014-2016

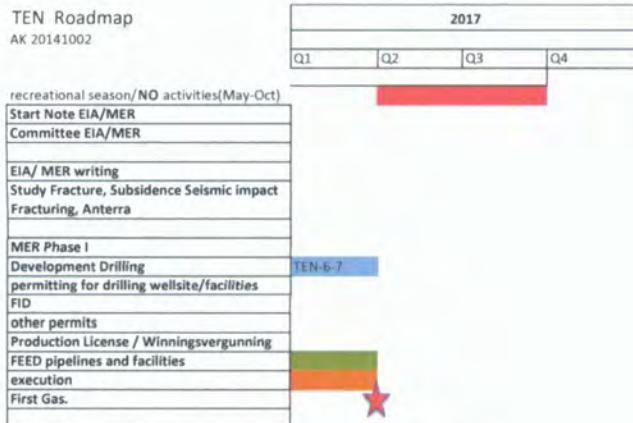

Figure 5: Development Roadmap 2017

## 4 Geology of the Terschelling Noord area

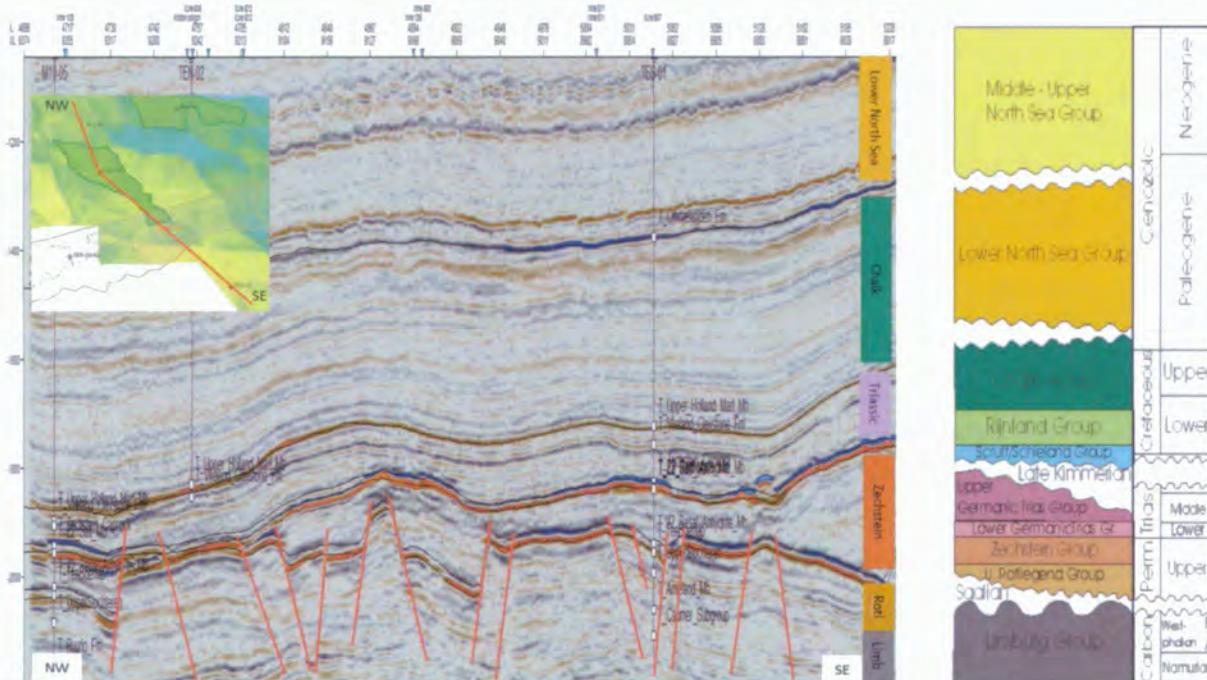

### 4.1 Geological setting

The Terschelling-Noord licence is located on the edge of the North Netherlands High and the Vlieland Basin. The target interval is the Permian Rotliegend Slochteren formation. This is overlain by thick sealing Ten Boer Clays and Zechstein Anhydrites and Salt, which is the main top seal. The North Netherlands High has been a relatively stable block since the Mid Triassic times and therefore limited Upper Triassic, Jurassic and Lower Cretaceous sediments are preserved below the Base Cretaceous Unconformity in the area. A thick Cretaceous Chalk section is well preserved followed by stable North Sea sedimentation.

Structurally the area is dominated by two distinct fault trends that dissect the Rotliegend in the region into rhomb-shaped highs and lows. There is no major evidence of basin inversion affecting the area and faulting in the overburden section is very limited. Zechstein salt tectonics have been active until Tertiary times; salt thickness variations are included in the velocity models. The area is well positioned to receive hydrocarbon charge from underlying Carboniferous sediments from a large catchment area to the West and North.

The Stratigraphy for the area is shown in Figure 6 with an example seismic line from the region. The key elements from this stratigraphic column are those that make up the effective and proven Petroleum System for the region and can be seen in the lower part of the picture:

- Source Rock: Carboniferous coals and shales (Limburg Group, grey)
- Reservoir: Upper Rotliegend Slochteren Sandstone (light brown)
- Seals: Upper Rotliegend Ten Boer Claystone and thin evaporates, Permian Zechstein evaporites, and the Triassic Lower Bunter Shale.

**Figure 6: Left: Main seismic stratigraphic units and interpreted reflectors of the area of interest. NW-SE line. Right: Regional stratigraphic column. See text for details.**

In addition to the above elements, the timing of trap formation, generation and migration of hydrocarbons is also a key factor. With proven gas in the reservoir section of the TEN-2, this has been shown to be a working play in these fields. However the Zechstein salt seal is relatively thin over the area, which poses a risk to the top seal. The Poseidon prospect as well as the TEN tail block therefore carries a top seal risk to be quantified by further studies.

## 4.2 Reservoir geology

The gas bearing reservoir in the Terschelling-Noord discovery is the Upper Slochteren sandstone of the Permian Rotliegend Group. This is the proven producing reservoir in the nearby discoveries and producing fields of L12 and L15 to the west and Ameland complex to the east. As such the general reservoir geology is well known and understood (references 4) and 5).

The key wells with data in the larger Terschelling area are shown on the base map in Figure 9 and listed in Table 7. The log sets for these wells are of variable quality and completeness. Some of these wells were drilled in the 1960's-70's. The majority of the wells had core taken. This dataset allows a detailed sedimentological study (reference 4) and petrophysical analysis which was carried out by Geneva Petroleum Consultants International (GPCI) in 2014 (reference 1).

**Table 7: Key wells with data in the larger Terschelling area; location shown on map in Figure 9.**

| Well      | Year | Operator | Result | Log set   | Core |
|-----------|------|----------|--------|-----------|------|
| TEN-01    | 1992 | NAM      | Dry    | Complete  | yes  |
| TEN-02    | 1992 | NAM      | Gas    | Complete  | yes  |
| TER-01-S2 | 1963 | NAM      | Dry    | Very poor | yes  |
| TEW-01-S5 | 1989 | NAM      | Gas    | Mediocre  | no   |
| TES-01    | 1963 | Mobil    | Dry    | Very Poor | yes  |

Overall the Upper Slochteren sandstones are a mixture of lake-margin sabkha, fluvial sheetfloods and aeolian facies, as shown in Figure 7. Reservoir quality is largely controlled by depositional facies and the better reservoirs are generally located in the Aeolian and fluvial sediments. The overall reservoir quality improves to the south and west in the licence area. A detailed sedimentological study (reference 4) has led to a good geological understanding, which is the basis for the detailed 3D reservoir models. The models are populated with representative zonation, facies and petrophysical properties derived from log and core data. The models are used for volumetric assessment and forecasting of production profiles.

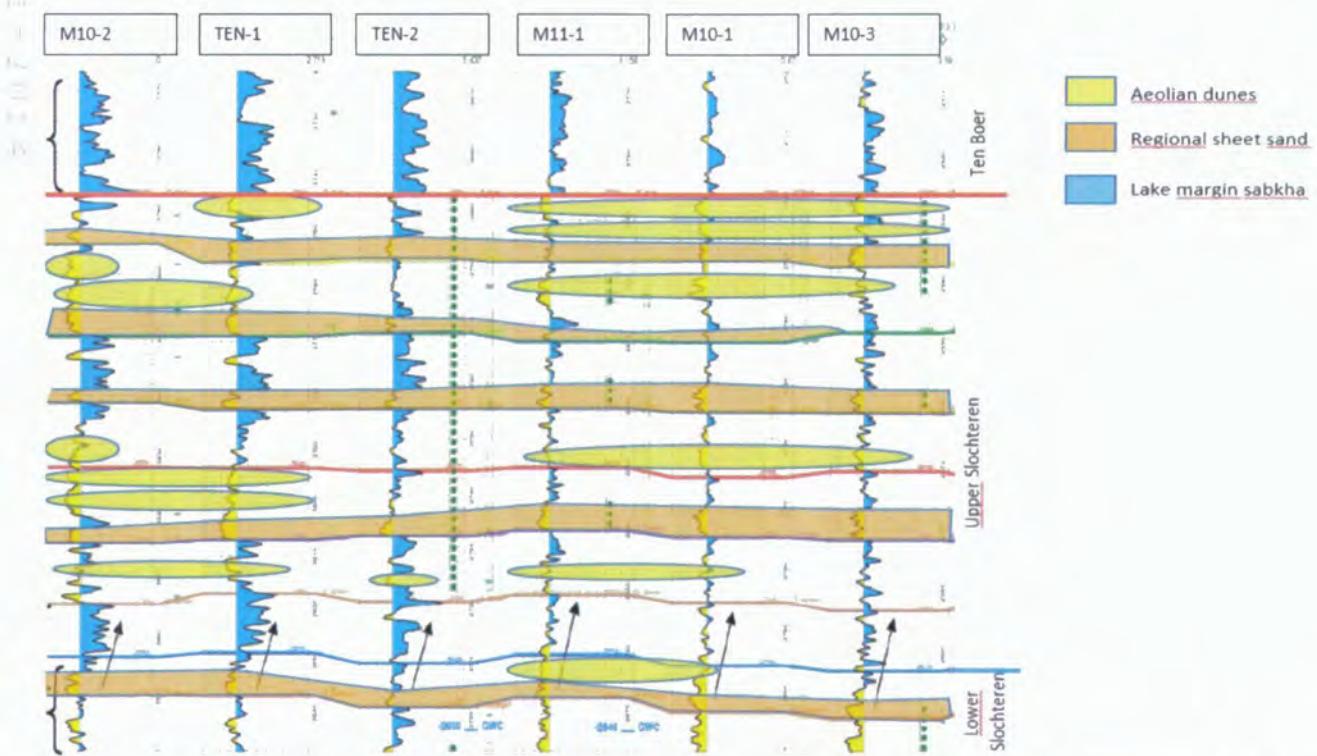

Figure 7: Regional well correlation panel of the Slochteren Formation, indicating the presence of aeolian dunes facies which have the best reservoir characteristics, regional sheet floods, that form additional good target reservoir, and shales that form local seals.

#### 4.3 Reservoir properties

Core was taken in all three key wells. The most extensive core was taken in TEN-02. Conventional core analysis was done and the resulting porosity-permeability measurements are shown in Figure 8. Turner (cf reference at the end) has demonstrated, by extensive core and sedimentological analysis, that there is a clear facies dependency of the rock quality, but that a single logarithmic relationship links the core porosity to the core permeability. As a result, no separate trends were implemented in the reservoir models and a simple porosity-permeability relationship was used to represent the properties in the different facies.

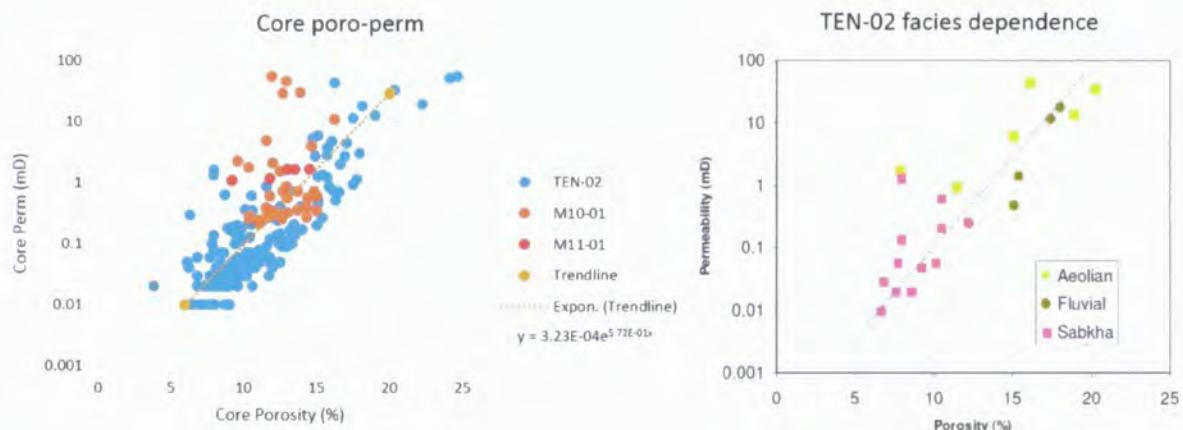

Figure 8: Core porosity and permeability from the well TEN-02, and nearby wells M10-01 and M11-01. Right: facies-dependence of the reservoir properties (reference 4).

#### 4.4 Seismic and structural interpretation

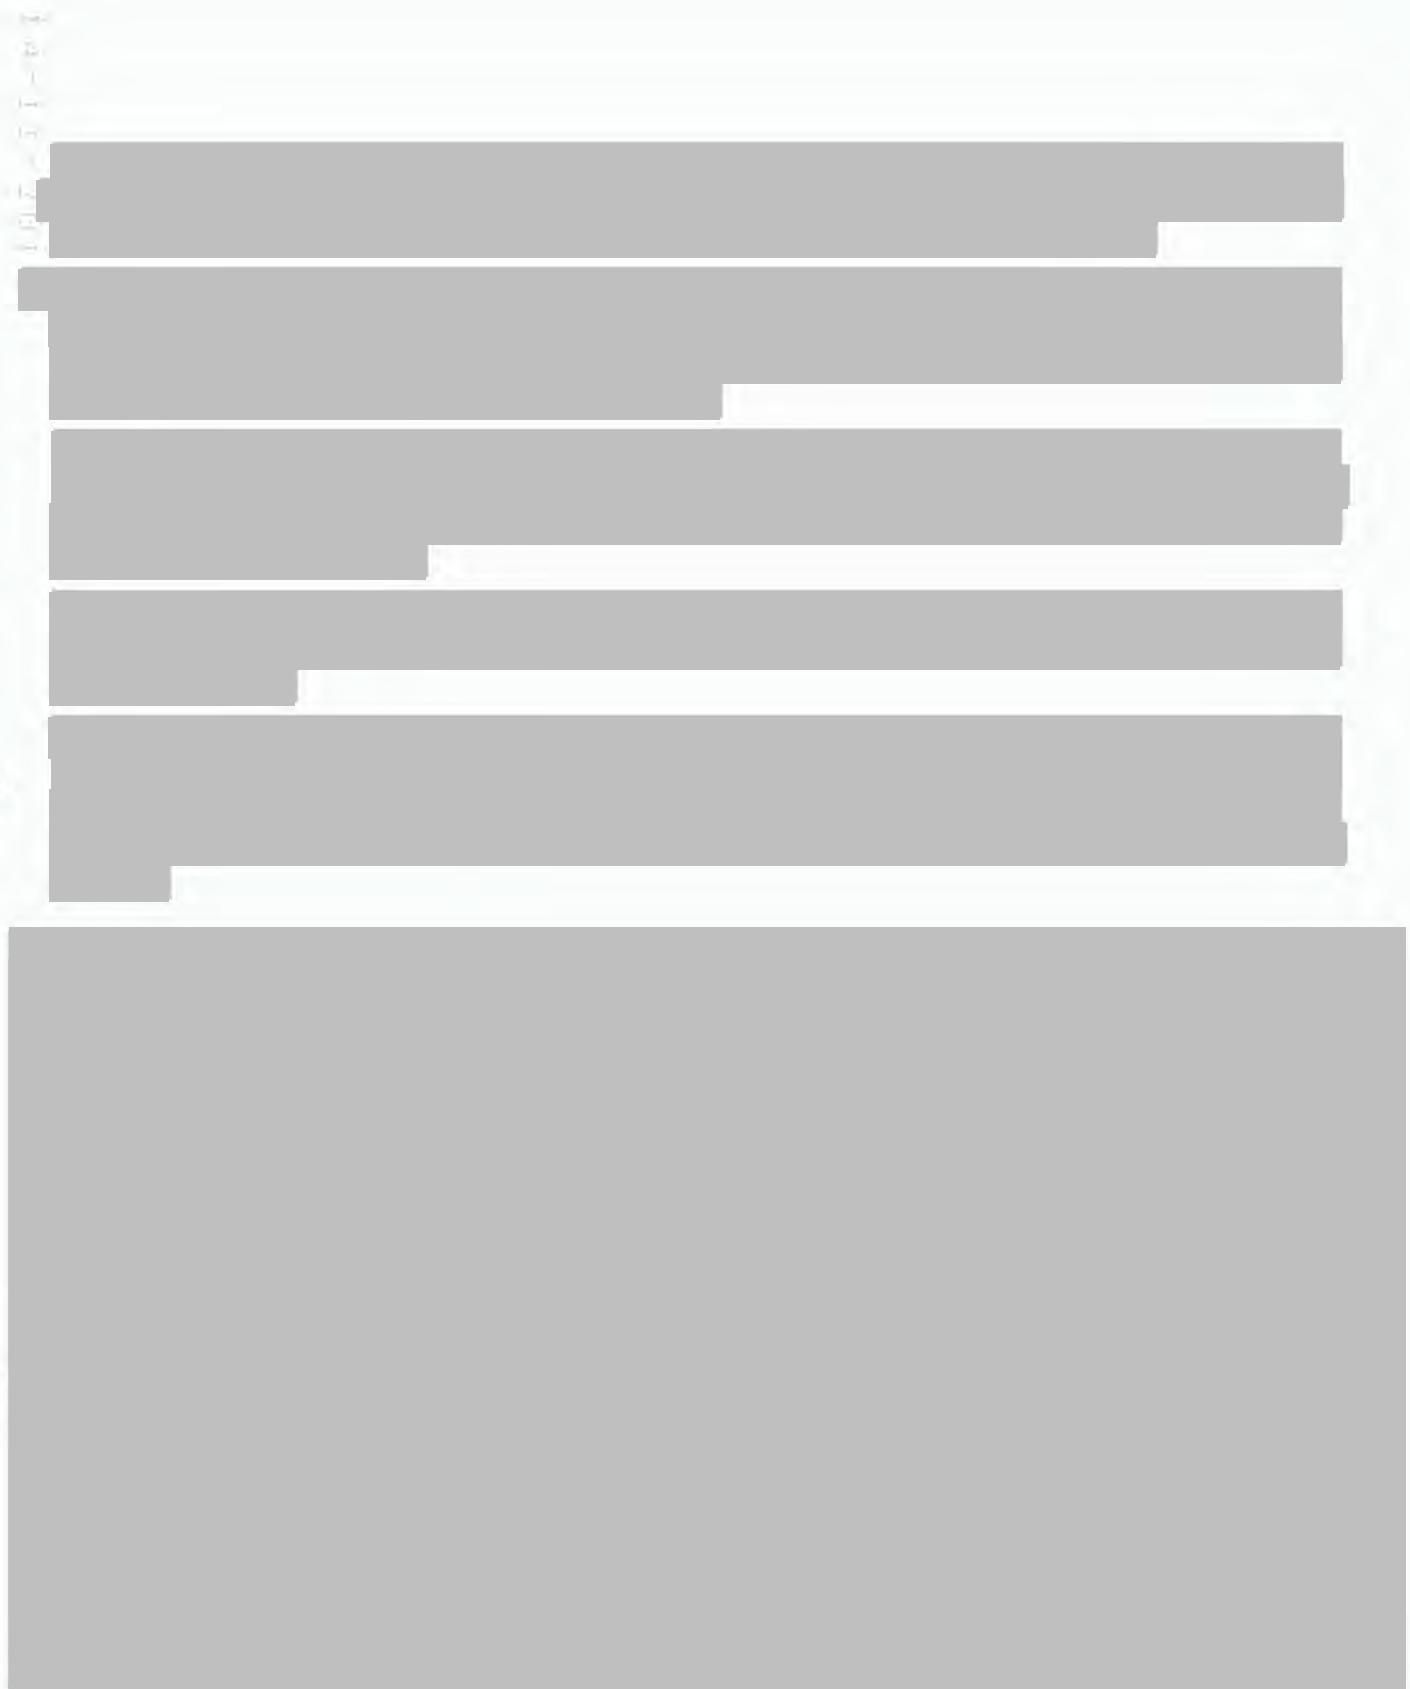

- Surveys L3NAM1995D and Z3NAM1996A were acquired by NAM between 1995 and 1996, respectively (Figure 9 and Figure 10). These surveys are publicly available from the TNO database; additional processing and velocity data has been acquired from NAM.

## 6.2 Production Tests in TEN-02

The primary target for the well TEN-02 was the Slochteren Sandstone. Two intervals were production tested (see Figure 19) and 1 interval was cored. The zones and results are shown in Table 16.

An RFT survey was run on 30<sup>th</sup> January 1993.

Figure 19: TEN-02

Table 16: TEN-02 formation tests

| Event | Formation | Top |  | Bottom |  |  |
|-------|-----------|-----|--|--------|--|--|
|       |           |     |  |        |  |  |

**Figure 20: TEN-02**

## 6.3 Dynamic modelling

### 6.3.1 General

### 6.3.2 Dynamic implementation in Mbal

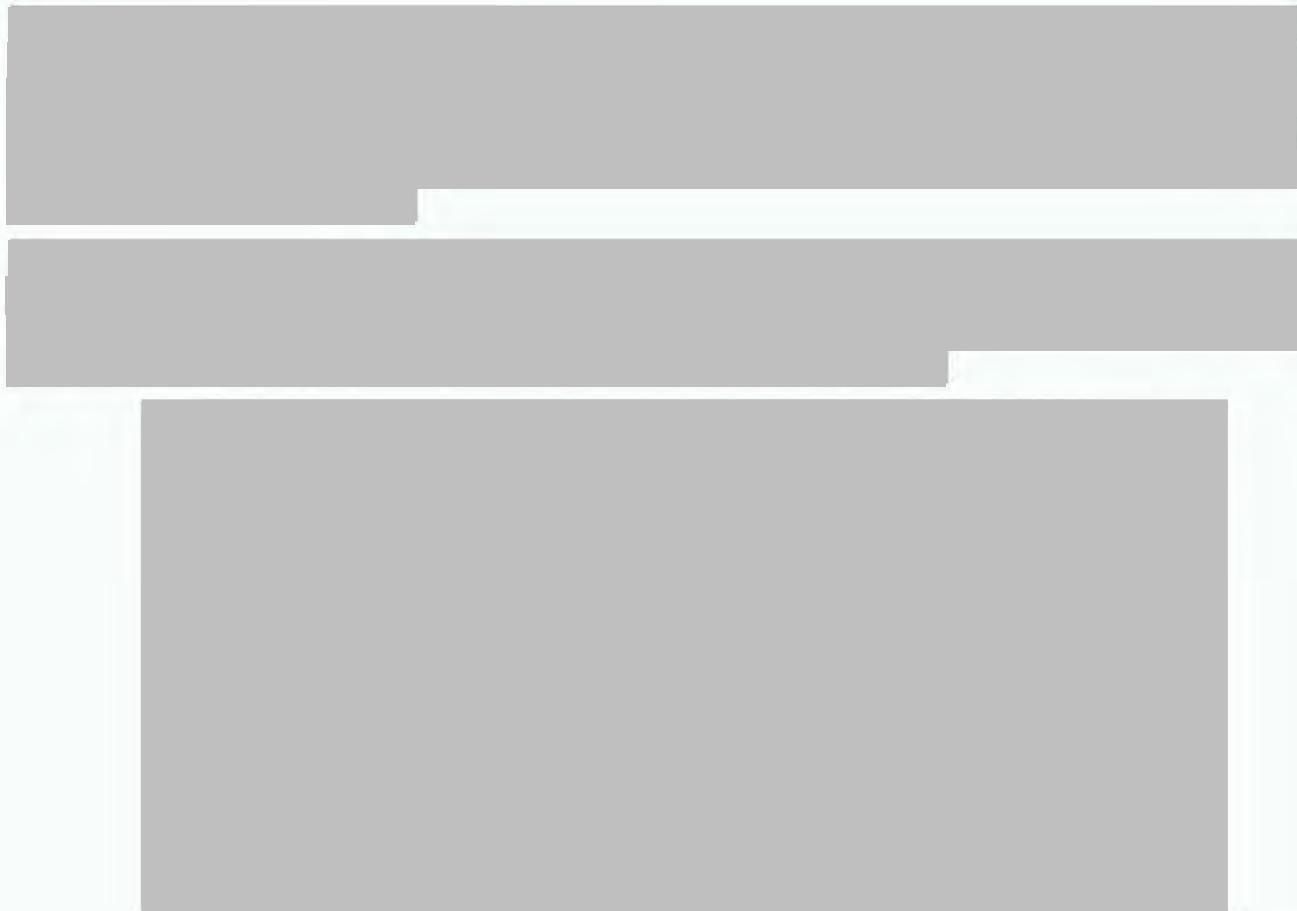

Figure 21:

The calculated/assumed dynamic properties for the Low, Mid and High cases are summarized:

**Table 17: Summary Sheet for Dynamic the Calculated Q50 Gas Rate**

The diagram consists of a 4x4 grid of white squares. Overlaid on this grid are several gray rectangles of varying sizes and positions, representing different constraints or regions. The rectangles include:

- A large rectangle spanning the first two columns and the top four rows.
- A rectangle spanning the last two columns and the top three rows.
- A rectangle spanning the last two columns and the bottom two rows.
- A rectangle spanning the first column and the bottom three rows.
- A rectangle spanning the last column and the bottom three rows.
- A rectangle spanning the first two columns and the bottom two rows.
- A rectangle spanning the last two columns and the bottom two rows.
- A small rectangle in the second column of the fourth row.
- A small rectangle in the fourth column of the third row.

## 7 Field development concept

## 7.1 Development concept

The described development concept is chosen on initial evaluation/screening and is used in this FDP as an option to demonstrate an economic viable development concept. The mentioned options are still subject to further detail investigation and evaluation during the MER process.

The TEN field will be developed with 5 wells in the mid case scenario. All 5 wells will be drilled from onshore and 3 out of them are extended reach. Due to the relatively high CO<sub>2</sub> content 1 injector well is included in the development. There is no difference between the high and mid case in terms of the number of wells. The low case includes 4 wells only.

The field consists of 4 blocks: tail, east, central and west. The first well will be drilled into the southern-most block of the Terschelling-Noord Field referred to as the 'tail' block. It is situated under the northern shoreline of the island and will have a roughly 400 m horizontal interval in the reservoir. A similar well will be drilled in the tail for the purpose of CO<sub>2</sub> injection. Then an extended reach well will be drilled to the central block some 4 km offshore, followed by another to the west and a final well to the central block again. These 3 wells will have a horizontal reservoir section of ~1 km.

CO<sub>2</sub> separation and gas treatment will also take place onshore. Gas will be treated to NGT spec (Water dew pointing and free condensate separation), while CO<sub>2</sub> content will be reduced to 3% max. CO<sub>2</sub> will be re-injected in the tail block after some initial production and pressure depletion. The option of burning the gas rich CO<sub>2</sub> (>10% of the CO<sub>2</sub> stream) to generate power for the facilities and the island will be considered.

**Figure 22: TEN development overview**

Gas will be exported via an offshore line to the NGT. The structure of NGT tariff (per km transported) is such that the tariff at the furthest point will also be reduced. NGT offers the service of laying lines and connecting to their pipeline, with the possibility of including the cost in the long term tariff.

The nearest point for a tap-in to the NGT is located some 7 km offshore. Initial study (reference 5) highlights that taking a longer route of 40 km to the nearest existing tie in point on the NGT is likely to be cheaper than a hot tap over M10-FA (estimated at 35 mln \$). An 8" pipeline will be drilled under the dunes (HDD) with a total 2 km of drilling up to the offshore connection point offshore. A flat barge will lay the pipeline on a reel 40 km further. The line will be built in carbon steel.

Alternative export scenarios by making use of an existing Gasunie pipeline (6 inch diameter, 40 barg design pressure) between the island and shore did not screen. The flow would be limited to 400- 200k Nm<sup>3</sup>/d. Additional infrastructure would be required from shore landing point to Harlingen, closest tie-in point of Gasunie and more importantly Tulip Oil needs to provide "Groningen" quality gas to the island, meaning bringing the Wobbe Index into a certain range and ensure a very high availability. In addition to guarantee security of supply, it would either require bi-directional flow (requiring a high outlet pressure in the pipeline and reducing the flow by ca 50%) or a gas storage facility. Additional CAPEX is in the order of € 15 million, excluding storage. Also alternatives to cross the Waddenzea were considered however not seen as realistic.

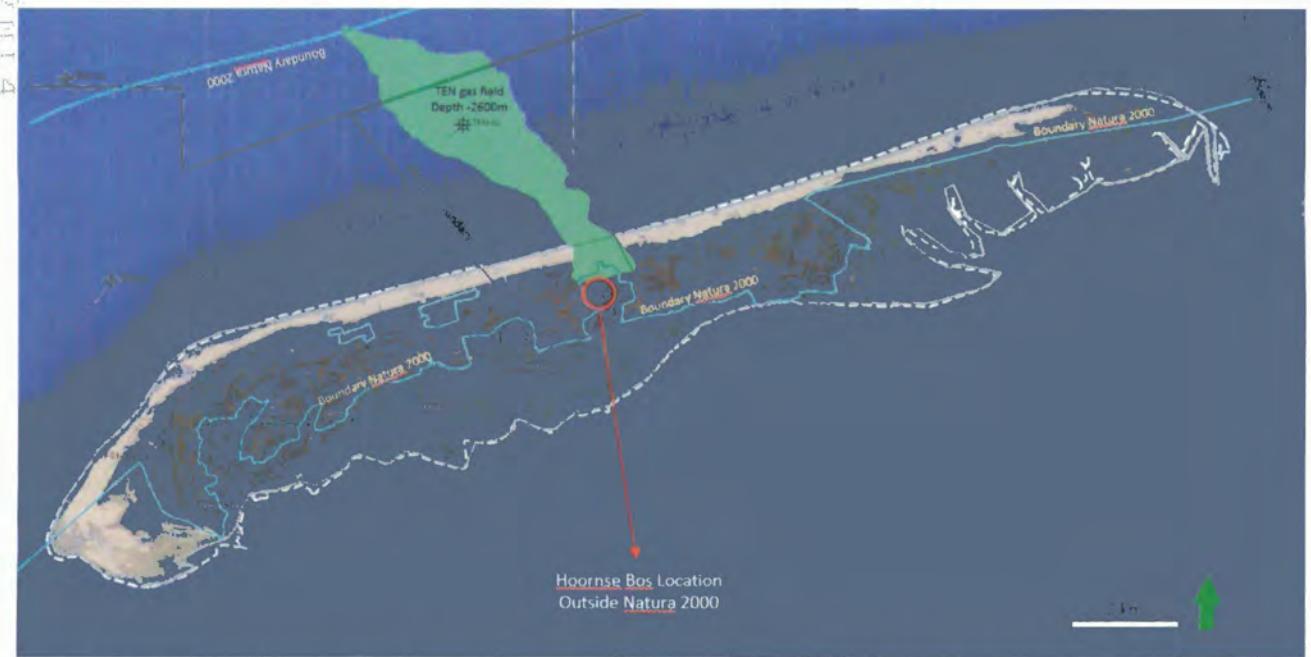

## 7.2 Development well TEN-03 and TEN full field development

Phase A of the development plan encompasses a first development well in the tail block of the TEN Field: TEN-03. This well will be a vertical well with a ~400 m horizontal section in the Slochteren reservoir. It will be drilled from the Island into the tail block of the Terschelling-Noord Field. A potential surface location is shown in Figure 23 and used for this FDP.

The objectives of this well are:

- to calibrate productivity of the well
- to prove the presence of hydrocarbons in the tail block
- to prove a common gas-water contact throughout the Terschelling-Noord Field
- to test and optimise drilling and completion strategy in this environment
- to test the reservoir quality and well productivity
- to investigate the hydraulic stimulation results
- to produce hydrocarbons during the production phase

A map and 3D view of the first vertical well TEN-03 and the other development wells for the TEN field are shown in Figure 24. The TEN field development and full area development concept and phasing will be discussed in further chapters.

#### 7.3.4 CAPEX for combined on- and offshore development

## 8 Production Technology

The main focus of this chapter is the completion/production technology aspects of the first development well.

### 8.1 First Well Type

### 8.2 Sand face completion

### 8.3 Tubing size selection

### 8.4 Metallurgy

### 8.5 Perforating, clean-up and testing

In this development plan all wells require perforations, stimulations and testing in order to confirm the reservoir properties and well performance. Testing of the wells, except for the first TEN-03 well, would take place via the production facilities. A detailed operational program for these activities needs to be made in the relevant well proposals.

### 8.6 Liquid production

## 9 Development Production Profiles

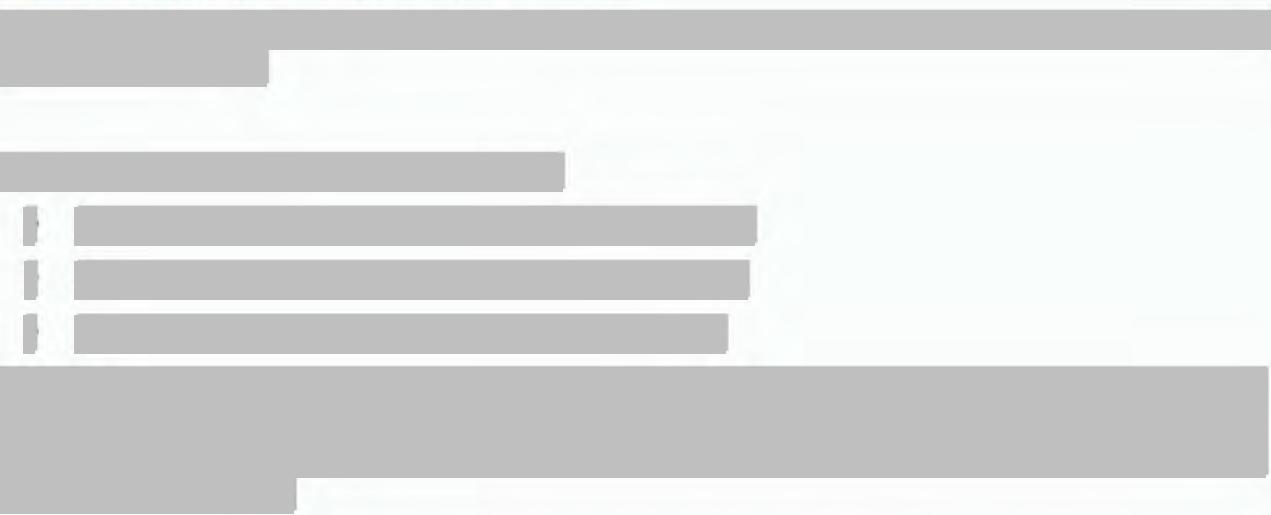

Table 23: Scenario Assumption matrix: the options used for the presented forecasts are highlighted.

|  | Productivity | Recovery | GIIP |
|--|--------------|----------|------|
|  |              |          |      |

**Figure 25: Total production profiles**

**Table 24: TEN Production Forecast Results**

## 10 Economics

The main assumptions used for testing the open book economic viability of the TEN is as followed:

Table 25: Summary economics

| Assumption   | Description              | Impact              | Conclusion              |
|--------------|--------------------------|---------------------|-------------------------|
| Assumption 1 | Assumption 1 Description | Assumption 1 Impact | Assumption 1 Conclusion |
| Assumption 2 | Assumption 2 Description | Assumption 2 Impact | Assumption 2 Conclusion |
| Assumption 3 | Assumption 3 Description | Assumption 3 Impact | Assumption 3 Conclusion |
| Assumption 4 | Assumption 4 Description | Assumption 4 Impact | Assumption 4 Conclusion |
| Assumption 5 | Assumption 5 Description | Assumption 5 Impact | Assumption 5 Conclusion |

12 Appendix 1 Deterministic volume ranges & reservoir cross sections

**Table 26: Summary of deterministic volume range**

A horizontal bar at the bottom of the slide. The top portion is blue, and the bottom portion is white. The white section has a thin black border.

**Table 27: Deterministic volume split per compartment**

Deterministic Volumes Split per segment

The figure displays a 10x10 grid of gray squares, representing deterministic volumes split across 10 segments. The grid is divided into two main sections by a vertical line at the center. The left section shows a repeating pattern of horizontal bars of varying lengths, while the right section shows a more complex, stepped pattern of vertical bars. The overall pattern suggests a periodic or structured distribution of volumes across the segments.

**AUDIT REPORT**

To the directors of  
Tulip Oil Netherlands B.V.  
Alexanderstraat 18  
2514 JM Den Haag

| <i>Reference</i> | <i>Processed by</i> | <i>Date</i>  |
|------------------|---------------------|--------------|
| 552300/2013      | S. Bruijzen         | July 8, 2014 |

Dear Mr. R.J. Platenkamp,

We hereby send you the report regarding the financial statements for the year 2013 of your company.

## **1 AUDIT**

In accordance with your instructions we have compiled the annual account 2013 of your company, including the balance sheet with a total of € 18,229,608 and the profit and loss account with a post-tax profit of € 928,393.

## **2 COMPILEMENT REPORT**

### **Audit**

In accordance with your instructions we have compiled the financial statements 2013 of Tulip Oil Netherlands B.V. in Den Haag, which comprise the balance sheet as at December 31, 2013, the profit and loss account for 2013 and the notes.

### **Management's responsibility**

The distinctive feature of a compilation engagement is that we compile financial information based on information provided by management of your company. Management is responsible for the accuracy and completeness of the information provided and the financial statements based thereon.

### **Accountant's responsibility**

Our responsibility as accountant is to perform our engagement in accordance with Dutch Law, including the professional and ethical requirements applying to accountants.

In accordance with the professional standard applicable to compilation engagements, our procedures were limited primarily to gathering, processing, classifying and summarizing financial information. Furthermore we have evaluated the appropriateness of the accounting policies which are used to compile the financial statements, based on the information provided by management. The nature of our procedures does not enable us to express any assurance on the true and fair view of the financial statements.

### **Confirmation**

Based on the information provided to us, we have compiled the financial statements using the accounting policies as included in Part 9 of Book 2 of the Dutch Civil Code.

## **3 GENERAL**

### **3.1 Company**

The main activities of Tulip Oil Netherlands B.V. include the exploration and production, onshore and offshore, of hydrocarbon volumes in The Netherlands

### **3.2 Board**

On December 31, 2013 the board of directors is formed by Mr. E.W. Steenken.

Tulip Oil Netherlands B.V. in Den Haag

---

**3.3 Appropriation of the nett result 2013**

The profit for the year 2013 amounts to € 928,393 compared with a profit for the year 2012 of € 1,525,967. The proposed appropriation of result is disclosed under other information.

**3.4 Appropriation of the nett result 2012**

In accordance with the proposition from the Board of Directors, the appropriated profit is approved by the General Meeting for the year 2012 on 12 juni 2013. The profit for the year 2012 of € 1,525,967 has been added to the other reserves.

Tulip Oil Netherlands B.V. in Den Haag

**4 FISCAL POSITION**

**4.1 Taxable amount 2013**

The taxable amount for 2013 has been calculated as follows:

|                     | 2013              |
|---------------------|-------------------|
|                     | €                 |
| Result before taxes | <u>-2,564,032</u> |

No corporate income tax is due over the taxable amount.

The corporate income tax/ state profit share credited to the result of 2013 may be specified as follows:

*Deferred tax*

|              |                   |
|--------------|-------------------|
| Deferred tax | <u>-3,492,425</u> |
|--------------|-------------------|

The amount of € 3,492,425 consists of the following elements:

- deferred tax claim of € 2,336,389;
- deferred state profit share of € 3,731,293;
- deferred tax claim related to deferred state profit share of - € 2,575,257.

We will gladly provide further explanations upon request.

Sincerely yours,  
Blue Line Accountants en Belastingadviseurs B.V.  
Auditors and Tax advisors

### 3 NOTES TO THE STATEMENTS

#### GENERAL

##### **Activities**

The main activities of Tulip Oil Netherlands B.V. include the exploration and production, onshore and offshore, of hydrocarbon volumes in The Netherlands.

##### **Group structure**

The company is part of a group of companies lead by Tulip Oil Holding B.V. at Den Haag, the financial statements of the group related companies are consolidated into the Annual report of Tulip Oil Holding B.V.

#### GENERAL ACCOUNTING PRINCIPLES FOR THE PREPARATION OF THE ANNUAL ACCOUNTS

The annual accounts have been prepared in accordance with Title 9 Book 2 of the Dutch Civil Code. The annual accounts have been prepared based on the historical cost. Valuation of assets and liabilities and determination of the result takes place under the historical cost convention.

#### PRINCIPLES OF VALUATION OF ASSETS AND LIABILITIES

##### **Tangible fixed assets**

Tangible fixed assets are presented at cost less accumulated depreciation and, if applicable, less impairments in value. Depreciation for production assets is based on units of production (UOP). Other tangible fixed assets are being depreciated on the estimated useful life and calculated as a fixed percentage of cost, taking into account any residual value. Depreciation is provided from the date an asset comes into use. Land is not depreciated.

Production assets: assets directly related to produce hydrocarbons, drilling costs and associated cost (facilities, pipeline etc.). Production assets are capitalized as tangible fixed assets at cost. The regular depreciation is based on units of production (UOP). Therefore no depreciation is made before the actual production starts. When the production starts the asset is reclassified from assets under construction to asset in use.

##### **Intangible fixed assets**

###### Exploration and evaluation costs ("E&E")

E&E costs are initially capitalized within intangible assets as soon as commercial reserves have been discovered. Such E&E costs include licence acquisition costs, geological and geophysical costs, costs of drilling exploration and appraisal wells, and an appropriate share of overheads. E&E costs are capitalized and accumulated in cost pools which are not larger than a segment.

Costs related to such properties are not amortised until such a time as the related property has been appraised and put on production.

E&E assets are assessed for impairment and the resultant carrying value is reclassified as oil and gas assets within property, plant and equipment, on a field by field basis.

Upon initial recognition the receivables on and loans to participations and other receivables are valued at fair value and then valued at amortised cost, which equals the face value, after deduction of any provisions.

## Tulip Oil Netherlands B.V. in Den Haag

---

### Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

### Receivables and deferred assets

Upon initial recognition the receivables on and loans to participations and other receivables are valued at fair value and then valued at amortised cost, which equals the face value, after deduction of any provisions. The fair value and amortised cost equal the face value. Any provisions for the risk of doubtful debts are deducted. These provisions are determined based on individual assessment of the receivables.

### Cash and cash equivalents

The cash is valued at face value. If cash equivalents are not freely disposable, then this has been taken into account in the valuation.

### Provisions

A provision is recognized when the company has a present obligation as a result of a past event, when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are valued at present value.

### Liabilities

Liabilities are valued at nominal value, unless determined differently.

## PRINCIPLES FOR THE DETERMINATION OF THE RESULT

### General

The result is defined as the difference between the revenue from goods delivered and services performed on one hand and, on the other hand, the costs and expenses for that year, valued at historical costs.

### Determination of the result

The result is determined based upon the difference between the nett turnover and the costs and other expenses taking into account the aforementioned valuation principles.

### Amortisation and depreciation

The depreciation of the tangible fixed assets is based on UOP for production assets. Other tangible fixed assets are being depreciated using fixed percentages.

## Financial income and expenses

Financial income and expenses comprise interest income and expenses for loans (issued and received) during the current reporting period.

## Taxes

Corporate income tax is calculated at the applicable rate on the result for the financial year, taking into account permanent differences between profit calculated according to the annual account and profit calculated for taxation purposes, and with which deferred tax assets (if applicable) are only valued insofar as their realisation is likely.

**Signing of the financial statements**

Den Haag, July 8, 2014

Tulip Oil Holding B.V.  
On behalf of,

R.J. Platenkamp

Tulip Oil Netherlands B.V. in Den Haag

---

**OTHER INFORMATION**

**1 Statutory appropriation of profit**

Based on article 20 of the articles of association the result is at disposal of the General Shareholders Meeting.

20.1 The profit of the financial year is at the disposal of the shareholders meeting. When the financial statements are adopted without a decision of the shareholders meeting on the appropriation of profit, the profit will be added to the other reserves.

20.2 Distribution of profits is only permitted after adoption of the financial statements which prove that they are allowed.

20.3 The shareholders meeting can decide on a interim distribution of profits out of the general reserves of the company. Also the management is allowed to decide on interim distribution.

20.4 Distributions of profits are immediately made payable, unless decided otherwise.

20.5 The company can only distribute profits to shareholders and other rightful owners to the maximum of the distributable part of equity.

20.6 There will no distribution on shares or certificated held by the company.

20.7 The shares held by the company are not included in the calculation on the distribution per share.

20.8 The term of limitation on the distribution of profits is 5 years after they have become payable.

**2 Appropriation of the result for the 2012 financial year**

The annual account for 2012 was adopted by the General Shareholders Meeting. The General Shareholders Meeting has determined the appropriation of the result as it was proposed.

**3 Appropriation of the profit for 2013**

The board of directors proposes to add the profit for 2013 of € 928,393 to the other reserves.

This proposal has been processed in the annual account in advance of the adoption by the General Meeting.

## 5. Notes to the consolidated special purpose financial statements for the year ended December 31, 2013

### 1. General information

Tulip Oil Holding B.V. (the Company) is a limited Company incorporated in The Netherlands. The Company is the ultimate parent company of the group. The address of its registered office and principal place of business is Alexanderstraat 18, 2514JM Den Haag, the Netherlands. As of December 31, 2013 the Company has three shareholders: Northwarf Nominees Limited, R.J.P. Beheer B.V. and Tulip Oil Investment B.V. For further information regarding the shareholders please refer to note 22. The Company Tulip Oil Holding B.V. is an upstream development and production company with a focus on oil and gas assets in Western Europe. The Company was established in July 2010 to exploit opportunities in undeveloped oil and gas field discoveries. In addition, Tulip Oil will look at late-life, mature assets, which still hold incremental potential for a value conscious, technically astute and innovative management team.

As the Company purchased 75% of the shares of Rhein Petroleum GmbH on January 7, 2011, the Company forms a group with Rhein Petroleum GmbH since January 7, 2011. On August 30, 2012, the Company purchased another 15% of the shares in Rhein Petroleum GmbH. The effective date of the purchase was September 8, 2012. Therefore, the Company now holds a 90% interest in the shares of Rhein Petroleum GmbH. On May 31, 2012, the Company acquired 100% of the shares of Smart Energy Solutions B.V.; after the purchase the company's name has been changed in Tulip Oil Netherlands B.V. The effective date of the acquisition was June 8, 2012. On July 15, 2013 Tulip Oil Oman B.V. has been incorporated by the Company. As a result of a restructuring within the group, in January 2014 Tulip Oil Holding Middle East B.V. acquired 100% of the shares of Tulip Oil Oman B.V.

The purpose of these financial statements is to give a consolidated view on the financial position of the Tulip Oil Group of Companies to the shareholders. The statutory company-only financial statements of the Company will be filed at the Chamber of Commerce in The Hague, the Netherlands.

### 2. Application of new and revised International Financial Reporting Standards (IFRSs)

#### ***2.1 Amendments to IFRSs affecting amounts reported and/or disclosures in the financial statements***

In the current year, the Group has applied a number of new and revised IFRSs issued by the International Accounting Standards Board (IASB) that are mandatorily effective for an accounting period that begins on or after 1 January 2013.

##### ***Amendments to IFRS 7 Disclosures – Offsetting Financial Assets and Financial Liabilities***

The Group has applied the amendments to IFRS 7 *Disclosures – Offsetting Financial Assets and Financial Liabilities* for the first time in the current year. The amendments to IFRS 7 require entities to disclose information about rights to offset and related arrangements (such as collateral posting requirements) for financial instruments under an enforceable master netting agreement or similar arrangement.

The amendments have been applied retrospectively. As the Group does not have any offsetting arrangements in place, the application of the amendments has had no material impact on the disclosures or on the amounts recognized in the consolidated financial statements.

**Deloitte.**

Deloitte Accountants B.V.

For identification purposes.  
Related to the independent auditor's report dated:

JUL 30 2014

**New and revised Standards on consolidation, joint arrangements, associates and disclosures**

In May 2011, a package of five standards on consolidation, joint arrangements, associates and disclosures was issued comprising IFRS 10 *Consolidated Financial Statements*, IFRS 11 *Joint Arrangements*, IFRS 12 *Disclosure of Interests in Other Entities*, IAS 27 (as revised in 2011) *Separate Financial Statements* and IAS 28 (as revised in 2011) *Investments in Associates and Joint Ventures*. Subsequent to the issue of these standards, amendments to IFRS 10, IFRS 11 and IFRS 12 were issued to clarify certain transitional guidance on the first-time application of the standards.

In the current year, the Group has applied for the first time IFRS 10 and IFRS 12 together with the amendments to IFRS 10 and IFRS 12 regarding the transitional guidance. IFRS 11, IAS 27 (as revised in 2011) and IAS 28 (as revised in 2011) are not applicable to the Group as it deals not with Joint Arrangements. The Group holds no Investments in Associates and Joint Ventures and prepares only consolidated financial statements under IFRS.

*Impact of the application of IFRS 10*

IFRS 10 replaces parts of IAS 27 *Consolidated and Separate Financial Statements* that deal with consolidated financial statements and SIC-12 *Consolidation – Special Purpose Entities*. IFRS 10 changes the definition of control such that an investor has control over an investee when a) it has power over the investee, b) it is exposed, or has rights, to variable returns from its involvement with the investee and c) has the ability to use its power to affect its returns. All three of these criteria must be met for an investor to have control over an investee. Previously, control was defined as the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Additional guidance included in IFRS 10 that deals with whether or not an investor that owns less than 50% of the voting rights in an investee has control over the investee is relevant to the Group.

The application of IFRS 10 had no impact on the consolidated financial statements of the Group as there are no changes in having control over the consolidated companies since the dates stated in paragraph 1 above.

*Impact of the application of IFRS 12*

IFRS 12 is a new disclosure standard and is applicable to entities that have interests in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities. In general, the application of IFRS 12 has resulted in more extensive disclosures in the consolidated financial statements (please see note 18 for details).

**Deloitte.**

Deloitte Accountants B.V.

For identification purposes.  
Related to the independent auditor's report dated:

JUL 30 2014

### **IFRS 13 Fair Value Measurement**

The Group has applied IFRS 13 for the first time in the current year. IFRS 13 establishes a single source of guidance for fair value measurements and disclosures about fair value measurements. The scope of IFRS 13 is broad; the fair value measurement requirements of IFRS 13 apply to both financial instrument items and non-financial instrument items for which other IFRSs require or permit fair value measurements and disclosures about fair value measurements, except for share-based payment transactions that are within the scope of IFRS 2 Share-based Payment, leasing transactions that are within the scope of IAS 17 Leases, and measurements that have similarities to fair value but are not fair value (e.g. net realizable value for the purposes of measuring inventories or value in use for impairment assessment purposes).

IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions. Fair value under IFRS 13 is an exit price regardless of whether that price is directly observable or estimated using another valuation technique. Also, IFRS 13 includes extensive disclosure requirements.

IFRS 13 requires prospective application from 1 January 2013. In addition, specific transitional provisions were given to entities such that they need not apply the disclosure requirements set out in the Standard in comparative information provided for periods before the initial application of the Standard. Please see note 32. Other than the additional disclosures, the application of IFRS 13 has not had any material impact on the amounts recognized in the financial statements.

### **Amendments to IAS 1 Presentation of Items of Other Comprehensive Income**

The Group has applied the amendments to IAS 1 Presentation of Items of Other Comprehensive Income for the first time in the current year. The amendments introduce new terminology, whose use is not mandatory, for the statement of comprehensive income and income statement. Under the amendments of IAS 1, the "statement of comprehensive income" is renamed as the "statement of profit or loss and other comprehensive income" and the "income statement" is renamed as the "statement of profit or loss". The amendments to IAS 1 retain the option to present profit or loss and other comprehensive income in either a single statement or in two separate but consecutive statements. However, the amendments to IAS 1 require items of other comprehensive income to be grouped in two categories in the other comprehensive income section: (a) items that will not be reclassified subsequently to profit or loss and (b) items that may be reclassified subsequently to profit or loss when specific conditions are met. Income tax on items of other comprehensive income is required to be allocated on the same basis – the amendments do not change the option to present items of other comprehensive income either before tax or net of tax.

The amendment of IAS 1 has not led to any presentation changes as the Group does not have items of other comprehensive income in its statement of profit or loss. The application of IAS 1 does not result in any impact on profit or loss, other comprehensive income and total comprehensive income.

**Deloitte.**

Deloitte Accountants B.V.

For identification purposes.  
Related to the independent auditor's report dated:

**Amendments to IAS 1 *Presentation of Financial Statements* (as part of the Annual Improvements to IFRSs 2009-2011 Cycle issued in May 2012)**

The Annual Improvements to IFRSs 2009-2011 have made a number of amendments to IFRSs. The amendments that are relevant to the Group are the amendments to IAS 1 regarding when a statement of financial position as at the beginning of the preceding period (third statement of financial position) and the related notes are required to be presented. The amendments specify that a third statement of financial position is required when a) an entity applies an accounting policy retrospectively, or makes a retrospective restatement or reclassification of items in its financial statements, and b) the retrospective application, restatement or reclassification has a material effect on the information in the third statement of financial position. The amendments specify that related notes are not required to accompany the third statement of financial position.

In the current year, the Group has applied a number of new and revised IFRSs (see discussion above), which has not resulted in effects on the consolidated statements of financial position as at 1 January 2012. Therefore, the Group has not presented a third statement of financial position as at 1 January 2012.

**IAS 19 *Employee Benefits* (as revised in 2011)**

In the current year, the Group has applied IAS 19 *Employee benefits* (as revised in 2011) and the related consequential amendments for the first time.

IAS 19 (as revised 2011) changes the accounting for defined benefit plans and termination benefits. The most significant change relates to the accounting for changes in defined benefit obligations and plan assets. The amendments require the recognition of changes in defined benefit obligations and in the fair value of plan assets when they occur, and hence eliminate the "corridor approach" permitted under the previous version of IAS 19 and accelerate the recognition of past service costs. All actuarial gains and losses are recognized immediately through other comprehensive income in order for the net pension asset or liability recognized in the consolidated statement of financial position to reflect the full value of the plan deficit or surplus. Furthermore, the interest cost and expected return on plan assets used in the previous version of IAS 19 are replaced with a "net interest" amount under IAS 19 (as revised in 2011), which is calculated by applying the discount rate to the net defined benefit liability or asset. In addition, IAS 19 (as revised in 2011) introduces certain changes in the presentation of the defined benefit cost including more extensive disclosures.

At the moment the Group has no defined benefit plans. Therefore, the changes in IAS 19 had no effect on the consolidated financial statements of the group.

## **2.2 New and revised IFRSs In issue but not yet effective**

The Group has not applied the following new and revised IFRSs that have been issued but are not yet effective:

|  |  |
|--|--|
| IFRS 9                                       | <i>Financial Instruments<sup>2</sup></i>   |
| Amendments to IFRS 9 and IFRS 7              | <i>Mandatory Effective Date of IFRS 9 and Transition Disclosures<sup>2</sup></i> |
| Amendments to IFRS 10, IFRS 12<br>and IAS 27 | <i>Investment Entities<sup>1</sup></i>   |
| Amendments to IAS 32                         | <i>Offsetting Financial Assets and Financial Liabilities<sup>1</sup></i>         |

<sup>1</sup> Effective for annual periods beginning on or after 1 January 2014 with earlier application permitted.

<sup>2</sup> Effective for annual periods beginning on or after 1 January 2015, with earlier application permitted

### ***IFRS 9 Financial Instruments***

IFRS 9 issued in November 2009 introduced new requirements for the classification and measurement of financial assets. IFRS 9 was amended in October 2010 and in November 2013 to include requirements for the classification and measurement of financial liabilities and for derecognition.

Key requirements of IFRS 9:

- All recognised financial assets that are within the scope of IAS 39 Financial Instruments: Recognition and Measurement to be subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. All other debt investments and equity investments are measured at their fair value at the end of subsequent accounting periods. In addition, under IFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognized in profit or loss.
- With regard to the measurement of financial liabilities designated as at fair value through profit and loss, IFRS 9 requires that the amount of change in the fair value of the financial liability, that is attributable to changes in the credit risk of the liability, is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Under IAS 39, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss was presented in profit or loss.

The directors anticipate that the application of IFRS 9 that the application of IFRS 9 may have significant impact on amounts reported in respect of the Group's financial assets and financial liabilities. However, it is not practicable to provide a reasonable estimate of that effect until a detailed review has been completed.

Deloitte Accountants B.V.

For identification purposes  
Related to the independent auditor's report dated:

JUL 30 2014

### ***Amendments to IFRS 10, IFRS 12 and IAS 27 Investment Entities***

The amendments to IFRS 10 define an investment entity and require a reporting entity that meets the definition of an investment entity not to consolidate its subsidiaries but instead to measure its subsidiaries at fair value through profit or loss in its consolidated financial statements.

To qualify as an investment entity, a reporting entity is required to:

- Obtain funds from one or more investors for the purpose of providing them with professional investment management services.
- Commit to its investor(s) that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both.
- Measure and evaluate performance to substantially all of its investments on a fair value basis.

Consequential amendments have been made to IFRS 12 and IAS 27 to introduce new disclosure requirements for investment entities.

The directors of the Company do not anticipate that the investment entities amendments will have any effect on the Group's consolidated financial statements as the Company is not an investment entity.

### ***Amendments to IAS 32 Offsetting Financial Assets and Financial Liabilities***

The amendments to IAS 32 clarify the requirements relating to the offset of financial assets and financial liabilities. Specifically, the amendments clarify the meaning of "currently has a legally enforceable right of set-off" and "simultaneous realization and settlement".

The directors of the Company do not anticipate that the application of these amendments to IAS 32 will have a significant impact on the Group's consolidated financial statements.

## **3. Significant accounting policies**

### ***3.1 Statement of compliance***

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union.

### ***3.2 Basis of preparation***

The consolidated financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Amounts are presented in thousands of euro (kEUR) unless indicated otherwise.

The principal accounting policies are set out below.

**Deloitte.**

Deloitte Accountants B.V.

For identification purposes  
Related to the independent auditor's report dated:

JUL 30 2014

### ***3.3 Basis of consolidation***

The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities if any) controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Company reassess whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Company, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statements of profit or loss and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the Group.

#### **3.3.1 Changes in the Group's ownership interests in existing subsidiaries**

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

**Deloitte.**

Deloitte Accountants B.V.

For identification purposes.  
Related to the independent auditor report dated: 

When the Group loses control of a subsidiary, a gain or loss is recognised in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. All amounts previously recognized in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary assets (i.e. reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable IFRSs). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under IAS 39, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.

### **3.4 Business combinations**

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that:

- deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with IAS 12 Income Taxes and IAS 19 Employee Benefits respectively;
- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with IFRS 2 Share-based Payment at the acquisition date; and
- assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that Standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value or, when applicable, on the basis specified in another IFRS.

**Deloitte.**

Deloitte Accountants B.V.

For identification purposes  
Related to the independent auditor's report dated:

JUL 30 2014

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with IAS 39, or IAS 37 Provisions, Contingent Liabilities and Contingent Assets, as appropriate, with the corresponding gain or loss being recognised in profit or loss.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date.

### **3.5 Goodwill**

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business (see note 3.4 above) less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss in the consolidated income statement. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

### **3.6 Revenue recognition**

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

#### **3.6.1 Sale of goods**

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;

**Deloitte.**  
Deloitte Accountants B.V.

For identification purposes.  
Related to the independent auditor's report dated:

- the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

### **3.6.2 Dividend and interest income**

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

## **3.7 Taxation**

Income tax expense represents the sum of the tax currently payable and deferred tax.

### **3.7.1 Current tax**

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated statement of profit or loss and other comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

### **3.7.2 Deferred tax**

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

**Deloitte.**

Deloitte Accountants B.V.

For identification purposes  
Related to the independent auditor's report dated:

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

### **3.7.3 Current and deferred tax for the period**

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

### ***3.8 Property, plant and equipment***

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss as an impairment charge.

Specific guidance regarding the accounting for Property, plant and equipment in connection with exploration and evaluation is given in note 3.15.4.

### ***3.9 Intangible assets***

#### **3.9.1 Intangible assets acquired separately**

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

#### **3.9.2 Intangible assets acquired in a business combination**

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

#### **3.9.3 Derecognition of intangible assets**

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

JUL 30 2014

### ***3.10 Impairment of tangible and intangible assets other than goodwill***

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

### ***3.11 Provisions***

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material). Once a provision is to be settled, the actual consideration may derive from the amount accounted for. Gains or losses arising from that deviation are recognised in the statement of profit or loss and other comprehensive income.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

#### **3.11.1 Contingent liabilities acquired in a business combination**

Contingent liabilities acquired in a business combination are initially measured at fair value at the acquisition date. At the end of subsequent reporting periods, such contingent liabilities are measured at the higher of the amount that would be recognised in accordance with IAS 37 *Provisions, Contingent Liabilities and Contingent Assets* and the amount initially recognised less cumulative amortisation recognised in accordance with IAS 18 *Revenue*.

**Deloitte.**

Deloitte Accountants B.V.

Related to the independent auditor's report dated:

### **3.11.2 Abandonment of wells and field cleaning**

The Tulip Oil Group of Companies accounts for those provisions by discounting the costs relating to the abandonment of wells and cleaning of the fields. The calculation of the costs reflects the best estimate for the consideration that is required to abandon the respective wells and to clean the fields taking cost increases into account. The provisions are made up when the drilling of the respective well starts. Test drillings are not included.

### **3.12 Financial instruments**

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

### **3.13 Financial assets**

Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

#### **3.13.1 Effective interest method**

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.

#### **3.13.2 Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables (including trade and other receivables and bank balances and cash) are measured at amortised cost using the effective interest method, less any impairment.

Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

#### **3.13.3 Impairment of financial assets**

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

**Deloitte**

Deloitte Accountants B.V.

For identification purposes  
Related to the independent auditor's report dated:

JUL 30 2014

For all other financial assets, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as a default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

For certain categories of financial assets, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss in the period.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

In respect of AFS equity securities, impairment losses previously recognised in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognised in other comprehensive income and accumulated under the heading of investments revaluation reserve. In respect of AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

### 3.13.4 Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss.

**Deloitte**

Deloitte Accountants B.V.

For identification purposes.  
Related to the independent auditor's report dated:

**JUL 30 2014**

On derecognition of a financial asset other than in its entirety (e.g. when the Group retains an option to repurchase part of a transferred asset), the Group allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

### **3.14 Financial liabilities and equity instruments**

#### **3.14.1 Classification as debt or equity**

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

#### **3.14.2 Equity instruments**

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

#### **3.14.3 Financial liabilities**

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

##### **3.14.3.1 Financial liabilities at FVTPL**

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been incurred principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and IAS 39 *Financial Instruments: Recognition and Measurement* permits the entire combined contract (asset or liability) to be designated as at FVTPL.

**Deloitte**

Deloitte Accountants B.V.

For identification purposes  
Related to the independent auditor's report dated:

JUL 30 2014

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item in the consolidated [statement of comprehensive income/income statement]. Fair value is determined in the manner described in note 32.

### **3.14.3.2 Other financial liabilities**

Other financial liabilities (including borrowings and trade and other payables) are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

### **3.14.3.3 Derecognition of financial liabilities**

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

## **3.15 Exploration for and evaluation of mineral resources**

The Tulip Oil Group of Companies applies the following accounting rules regarding the exploration for and the evaluation of mineral resources:

### **3.15.1 Licenses for exploration and costs for related geological evaluations (seismic)**

Licenses for exploration and costs for related geological evaluations (seismic):

Such licenses are capitalized as intangible assets at cost. Amortization starts with the purchase of the license on a straight line basis. The licenses have a limited life and are subject to approval of governmental bodies for continuation. Please also refer to note 3.9 regarding further guidance.

Seismic costs are not capitalized; these costs are expensed as incurred.

### **3.15.2 Licenses for production**

Such licenses are capitalized as intangible assets at cost. Amortization starts with the purchase of the license on a straight line basis. Please also refer to note 3.9 regarding further guidance.

### **3.15.3 Geological pre-evaluations, test drillings, consulting**

These costs are expensed as incurred.

### **3.15.4 Drilling costs**

Drilling costs are capitalized as tangible fixed assets at cost (each drilling/well is one asset).

No depreciation is made before the actual production starts (or could start). When the production starts, then regular depreciation also starts (regularly 20 years for new fields, 15 years for old fields unless other economic life) and the asset is reclassified from assets under construction for exploration purposes to exploration asset in use. The regular depreciation might be straight line or at falling rates according to the economic circumstances. Please also refer to note 3.8 regarding further guidance, especially on impairment of capitalized drilling costs.

### **3.15.5 Provision for the abandonment of wells and field cleaning**

Please refer to Note 3.11.2.

**Deloitte.**

Deloitte Accountants B.V.

JUL 30 2014

#### **4. Critical accounting judgements and key sources of estimation uncertainty**

In the application of the Group's accounting policies, which are described in note 3, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

##### ***4.1 Critical judgements in applying accounting policies***

As the Tulip Oil Group of Companies is still in the stage of mainly exploration of oil and gas there have not been material critical judgements, apart from those involving estimations (see Note 4.2), in the process of applying the Group's accounting policies.

##### ***4.2 Key sources of estimation uncertainty***

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

###### **4.2.1 Impairment of goodwill**

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value.

The carrying amount of goodwill at 31 December 2013 was kEUR 5,059 (2012: kEUR 5,059). No impairment loss had to be recognised during 2013 (2012: nil). For further details please refer to the explanations set out in note 16.

###### **4.2.2 Impairment of other intangible assets and assets under construction for exploration purposes**

Determining whether other intangible assets which mainly consist of licenses for the exploration and the production of oil and gas are impaired requires an estimation of the value in use of the cash-generating units to which those licenses have been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. This also applies for assets under construction for exploration purposes.

#### **5. Own work capitalised**

| Year ended<br>31/12/13 | Year ended<br>31/12/12 |

|                                     | Year ended<br>31/12/13<br>kEUR | Year ended<br>31/12/12<br>kEUR |
|-------------------------------------|--------------------------------|--------------------------------|
| Income from reimbursements partners | 453                            | 3,006                          |
| Income from management services     | 225                            | -                              |
| Other                               | 18                             | -                              |
|                                     | <b>696</b>                     | <b>3,006</b>                   |

**7. Purchased services**

|  | Year ended<br>31/12/13<br>kEUR | Year ended<br>31/12/12<br>kEUR |
|--|--------------------------------|--------------------------------|
|  | <b>3,068</b>                   | <b>13,806</b>                  |

Purchased services mostly consist of expenditures on licenses and external services concerning geological and seismic support as well as other external services.

**8. Depreciation and amortisation expense**

|   | Year ended<br>31/12/13<br>kEUR | Year ended<br>31/12/12<br>kEUR |
|---|--------------------------------|--------------------------------|
| Depreciation of property, plant and equipment   | 57                             | 14                             |
| Impairment charge property, plant and equipment | 4,281                          | -                              |
| Amortisation of intangible assets               | <b>5,169</b>                   | <b>5,421</b>                   |
| Total depreciation and amortisation expense     | <b>9,507</b>                   | <b>5,435</b>                   |

Amortisation expense for intangible assets contains impairment losses of kEUR 1 in connection with the abandoned well Q2A (prior year kEUR 328 in connection with the revoked license Oosterwolde and the abandoned well Q2A).

Amortisation expense for property, plant and equipment contains impairment losses of kEUR 4,281 in connection with the well Allmend / Germany due to fact that no commercial reserves were found.

**9. Employee benefit expense**

|                    | Year ended<br>31/12/13<br>kEUR | Year ended<br>31/12/12<br>kEUR |
|--------------------|--------------------------------|--------------------------------|

The income tax gain for the year can be reconciled to the accounting profit as follows:

|   | Year ended<br>31/12/13<br>kEUR | Year ended<br>31/12/12<br>kEUR |
|---|--------------------------------|--------------------------------|
| Loss before tax   | (16,697)                       | (19,111)                       |
| Income tax gain calculated at 28,1% (prior year: 29,1%)                                   | 4,692                          | 5,561                          |
| Effect of tax losses of prior years recognized as deferred tax assets in the current year | 1,721                          | 1,997                          |
| Adjustments of prior year tax calculations  | -                              | 402                            |
| Effect of deferred state profit share   | 1,156                          | 1,788                          |
| Effect of different tax rates   | 88                             | 61                             |
| Other   | (8)                            | 2                              |
| <br>Income tax gain recognised in profit or loss (relating to continuing operations)      | <br>7,649                      | <br>9,811                      |

The tax rates used for the 2013 and 2012 reconciliations above is a weighted mixed tax rate between the Netherlands and Germany.

### 13.2 Current tax assets and liabilities

|                                | 31/12/13<br>kEUR | 31/12/12<br>kEUR |
|--------------------------------|------------------|------------------|
| <b>Current tax assets</b>      |                  |                  |
| Tax refund receivable          | -                | 0                |
| <b>Current tax liabilities</b> |                  |                  |
| Income tax payable             | -                | -                |

Tax refund receivables referred to in the prior year relate to German corporation tax (as of December 31, 2012: EUR 436.75).

### 13.3 Deferred tax balances

The following is the analysis of deferred tax assets/(liabilities) presented in the consolidated statement of financial position:

|                          | 31/12/13<br>kEUR | 31/12/12<br>kEUR |
|--------------------------|------------------|------------------|
| Deferred tax assets      | 15,648           | 9,324            |
| Deferred tax liabilities | 2,117            | 3,442            |

**Deloitte.**

Deloitte Accountants B.V.

For identification purposes

Related to the independent audit report dated:

JUL 30 2014

| 2013   | Opening<br>balance | Additions due<br>to business<br>combination | Recognised<br>in profit or<br>loss | Closing<br>balance |
|--|--------------------|---|------------------------------------|--------------------|
|  | kEUR               | kEUR  | kEUR                               | kEUR               |
| <b>Deferred tax assets / liabilities in relation to:</b> |                    |   |                                    |                    |
| Intangible assets  | (3,442)            | -   | 1,325                              | (2,117)            |
| Provisions   | -                  | -   | 53                                 | 53                 |
| Tax losses   | 9,324              | -   | 6,271                              | 15,595             |
|  | 5,882              | -   | 6,324                              | 13,531             |

The tax losses are due to the fact that the Tulip Oil Group of Companies still is in a start-up phase resulting in high initial expenditure on R&D and no revenues in the first years. Management has performed tax planning and expects that based on the profit forecasts, profits will be generated in the upcoming 9 years which will be sufficient to offset the accumulated tax losses against.

#### 13.4 Unrecognised deductible temporary differences, unused tax losses and unused tax credits

|   | 31/12/13<br>kEUR | 31/12/12<br>kEUR |
|---|------------------|------------------|
| Deductible temporary differences, unused tax losses and unused tax credits for which no deferred tax assets have been recognised are attributable to the following: |                  |                  |
| - tax losses (revenue in nature)  | -                | -                |
|   | -                | -                |

Due to more certainty regarding the oil / gas reserves found, the Tulip Oil Group of Companies decided to capitalize the tax loss carry forwards existing as of December 31, 2013.

#### 14. Loss for the Period

Loss for the year is attributable to:

|                           | Year ended<br>31/12/13<br>kEUR | Year ended<br>31/12/12<br>kEUR |
|---------------------------|--------------------------------|--------------------------------|
| Owners of the Company     | (8,211)                        | (6,944)                        |
| Non-controlling interests | (837)                          | (2,356)                        |
|                           | <hr/>                          | <hr/>                          |
|                           | (9,048)                        | (9,300)                        |

## 15. Property, plant and equipment

|                             | 31/12/13<br>kEUR | 31/12/12<br>kEUR |
|-----------------------------|------------------|------------------|
| <b>Carrying amounts of:</b> |                  |                  |
| Machinery and Equipment     | 3,042            | 2,995            |
| Furnitures and Fixtures     | 521              | 70               |
| Prepayments                 | <u>21,683</u>    | <u>4,159</u>     |
|                             | <u>25,246</u>    | <u>7,224</u>     |

The development of Property, plant and equipment is shown as Appendix 1.

The following useful lives are used in the calculation of depreciation.

|  |              |
|--|--------------|
| Machinery and equipment  | 3 – 10 years |
| Furnitures and fixtures  | 3 – 10 years |
| Regarding the useful lives of wells please refer to note 3.15.4. |              |

## 16. Goodwill

|                               | 31/12/13<br>kEUR | 31/12/12<br>kEUR |
|-------------------------------|------------------|------------------|
| Cost                          | 5,059            | 5,059            |
| Accumulated impairment losses | -                | -                |
|                               | <u>5,059</u>     | <u>5,059</u>     |

### 16.1 Allocation of goodwill to cash-generating units

Goodwill has been allocated for impairment testing purposes to the following cash-generating units.

- Rhein Petroleum, Germany, kEUR 3,081
- Tulip Oil Netherlands, Netherlands, kEUR 1,978

#### Key assumptions

The recoverable amount of the cash-generating units is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering the periods until the end of the exploitation stage of the major projects included in the respective cash-generating unit and a discount rate of 10% per annum.

Cash flow projections are based on the expected quantities of oil and gas to be handled over the lifetime of the major projects of the respective cash-generating unit, expected market prices for oil and gas and expected exchange rates for US Dollar. The directors believe that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of the respective cash-generating unit.

The development of Other intangible assets is shown as Appendix 1.  
Licenses and software 1-30 years

## **18. Subsidiaries**

Details of the Group's subsidiaries at the end of the reporting period are as follows.

| Name of subsidiary         | Principal activity   | Place of incorporation and operation | Proportion of ownership interest and voting power held by the Group |          |
|----------------------------|--|--------------------------------------|---|----------|
|                            |  |                                      | 31/12/13  | 31/12/12 |
| Rhein Petroleum GmbH       | Exploration, production and manufacturing of carbon hydrides, especially oil and gas.                                  | Heidelberg, Germany                  | 90.0%   | 90.0%    |
| Tulip Oil Netherlands B.V. | Exploration and production, onshore and offshore of hydrocarbon volumes in The Netherlands.                            | The Hague, Netherlands               | 100.0%  | 100.0%   |
| Tulip Oil Oman B.V.        | Performing procedures for winning hydrocarbons and/or power generation on land as well as sea and all related services | The Hague, Netherlands               | 100.0%  | -        |

The company Tulip Oil Oman B.V. was incorporated by notarial deed on 15 July 2013 in The Hague as a private company with limited liability.

### **18.1 Details of non-wholly owned subsidiaries that have material non-controlling interests**

| Name of subsidiary   | Place of incorporation and principal place of business | Proportion of ownership interests and voting rights held by non-controlling interests |          | Loss allocated to non-controlling interests |          | Accumulated non-controlling interests |          |
|----------------------|--|---|----------|---|----------|---------------------------------------|----------|
|                      |  | 31/12/13  | 31/12/12 | 31/12/13                                    | 31/12/12 | 31/12/13                              | 31/12/12 |
| Rhein Petroleum GmbH | Germany  | 10%   | 10%      | (837)                                       | (2,356)  | 2,111                                 | 1,196    |

**31. Retirement benefit plans*****Defined contribution plans***

The employees of the Group's subsidiaries in Germany and in the Netherlands are members of a state-managed retirement benefit plan operated by the governments. The respective subsidiary is required to contribute a specified percentage of payroll costs to the retirement benefit scheme to fund the benefits. The only obligation of the Group with respect to the retirement benefit plan is to make the specified contributions.

The total expense recognised in the consolidated income statement of kEUR 64 represents contributions payable to these plans by the Group at rates specified in the rules of the plans.

## 32. Financial instruments

### 32.1 Capital management

The Group manages its capital to ensure that entities in the Group will be able to continue as going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance. The group's overall strategy remains unchanged from 2012.

The capital structure of the Group consists of net debt and equity of the Group (comprising issued capital, reserves, other reserves, retained earnings and non-controlling interests as detailed in notes 22 to 26).

The Group is not subject to any externally imposed capital requirements.

The Group's management reviews the capital structure of the Group on a regular basis. As part of this review, the committee considers the cost of capital and the risks associated with each class of capital.

### 32.2 Categories of financial instruments

|  | 31/12/13<br>kEUR | 31/12/12<br>kEUR |
|--|------------------|------------------|
| <b>Financial assets</b>                      |                  |                  |
| Cash and bank balances                       | 7,294            | 442              |
| Loans and receivables                        | 911              | 522              |
| <b>Financial liabilities</b>                 |                  |                  |
| Amortised cost - Trade and other payables    | 4,990            | 783              |
| Amortised cost - Other financial liabilities | 508              | 746              |

### 32.3 Financial risk management objectives

The Group's Corporate Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

### 32.4 Market risk

As of December 31, 2013 the Tulip Oil Group of Companies has no financial risks of changes in foreign currency exchange rates (see Note 32.5 below) and interest rates (see Note 32.6 below). The Tulip Oil Group of Companies has also not entered into derivative financial instruments. The maximum risk regarding receivables is limited to the respective book values. As the Tulip Oil Group of Companies only deals with business partners with the highest credit ratings, there is no specific risk as of December 31, 2013.

### 32.5 Foreign currency risk management

The Group undertakes only limited transactions denominated in foreign currencies; consequently, no material exposures to exchange rate fluctuations arise.

### 32.6 Interest rate risk management

The Group is not exposed to significant interest rate risk at the moment because no interest bearing borrowings exist as of December 31, 2013 and the Tulip Oil Group of Companies does not plan to use such borrowings as a financing instrument in the near future. Interest rate risks may arise out of short term bank borrowings but those risks are considered to be not material to the Tulip Oil Group of Companies. Due to this no interest rate sensitivity analysis has been performed as per year end.

Related to the independent auditor's report dated:

JUL 30 2014

### **32.7 Credit risk management**

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. The maximum credit risk exposure is limited to the book values.

The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

### **32.8 Liquidity risk management**

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short-, medium- and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

#### **32.8.1 Liquidity and interest risk tables**

The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The tables include both interest and principal cash flows, if any. The contractual maturity is based on the earliest date on which the Group may be required to pay.

JUL 30 2014

The following table details the Group's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest, if any, that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Group's liquidity risk management as the liquidity is managed on a net asset and liability basis.

|                         | Weighted average effective interest rate % | 1-3 months kEUR | 3 months to 1 year kEUR | 1-5 years kEUR | 5+ years kEUR | Total kEUR   |

**32.9.2 Valuation techniques and assumptions applied for the purposes of measuring fair value**

The fair values of financial assets and financial liabilities are generally determined as follows:

- The fair values of financial assets and financial liabilities with standard terms and conditions and traded on active liquid markets are determined with reference to quoted market prices (includes listed redeemable notes, bills of exchange, debentures and perpetual notes).
- The fair values of other financial assets and financial liabilities (excluding those described above) are determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

Specifically, significant assumptions used in determining the fair value of the following financial assets and liabilities are set out below.

**32.9.3 Fair value measurements recognised in the consolidated statement of financial position**

As of December 31, 2013, there are no financial instruments that are measured subsequent to initial recognition at fair value. The fair value levels are defined as follows.

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly and
- Level 3 inputs unobservable inputs for the asset or liability.

**33. Related party transactions**

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

***Compensation of key management personnel***

As of December 31, 2013 the Company has no key management employees as management function is provided by certain companies respectively their personnel.

The Company has paid the following management fees in the year 2013

|                     | Year ended<br>31/12/13<br>kEUR | Year ended<br>31/12/12<br>kEUR |
|---------------------|--------------------------------|--------------------------------|
| Short-term benefits | 1,399                          | 906                            |

### **34. Business combinations**

As of May 31, 2012, the Company acquired 100 % of the shares of Smart Energy Solutions B.V., The Hague, The Netherlands. After the purchase the name of the company was changed to Tulip Oil Netherlands B.V. (TON). Further information about this subsidiary can be found in section 18.

#### **34.1 Consideration transferred**

|      | TON<br>kEUR   |
|------|---------------|
| Cash | <u>10,229</u> |

#### **34.2 Assets acquired and liabilities recognised at the date of acquisition**

|                                | TON<br>kEUR    |
|--------------------------------|----------------|
| <b>Non-current assets</b>      |                |
| Plant and equipment            | 4              |
| Intangible assets              | <u>8,618</u>   |
| <b>Current assets</b>          |                |
| Cash and & cash equivalents    | 2,102          |
| Deferred tax assets            | 684            |
| Other                          | <u>183</u>     |
|                                | <u>11,591</u>  |
| <b>Non-current liabilities</b> |                |
| Provisions                     | (358)          |
| Deferred tax liabilities       | <u>(1,978)</u> |
| <b>Current liabilities</b>     |                |
| Trade and other payables       | (824)          |
| Other                          | <u>(180)</u>   |
|                                | <u>(3,340)</u> |
|                                | <u>8,251</u>   |

#### **34.3 Goodwill arising on acquisition**

|  | TON<br>kEUR    |
|--|----------------|
| Consideration transferred                            | 10,229         |
| Less: fair value of identifiable net assets acquired | <u>(8,251)</u> |
| Goodwill arising on acquisition                      | <u>1,978</u>   |

Goodwill arose in the acquisition of TON. The consideration paid effectively relates to the benefit of expected business potential and future business development in areas in which TON is active. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets.

The goodwill arising on this acquisition is not deductible for tax purposes.

**34.4 Net cash outflow on acquisition of subsidiaries**

|  | Year ended<br>31/12/12<br>kEUR |
|--|--------------------------------|
| Consideration paid in cash                       | 10,229                         |
| Less: cash and cash equivalent balances acquired | <u>(2,102)</u>                 |
|  | <u>8,127</u>                   |

**34.5 Impact of acquisitions on the results of the Group**

Included in the loss for the year 2012 is a profit of kEUR 736 attributable to the additional business generated by TON. There is no revenue included in respect of TON.

Had this business combination been effected 1 January 2012, the revenue of the Group would not have changed as TON has not gained revenue in 2012. The loss of the year would have been kEUR 9,236. The directors consider these "pro-forma" numbers to represent an approximate measure of the performance of the combined group on an annualized basis and to provide a reference point for comparison in future periods.

In determining the "pro-forma" revenue and profit of the Group had TON been acquired at the beginning of the current year, the directors have:

- calculated amortization of the licenses of TON on a full year basis based on the fair values of these licenses arising in the initial accounting for the business combination rather than the carrying amounts recognized in the pre-acquisition financial statements.
- fully applied the Tulip Oil Group of Companies' accounting principles for the TON financial statements.

During the year 2013 no post-acquisition events have occurred.

## 35. Operating lease arrangements

### 35.1 The Group as lessee

#### 35.1.1 Leasing arrangements and other financial commitments

Operating leases relate to leases of office space and cars as well as the purchase of management services. The Group does not have an option to purchase leased assets at the expiry of the lease periods.

#### 35.1.2 Payments recognised as an expense

|                        | Year ended<br>31/12/13<br>kEUR |
|------------------------|--------------------------------|
| Minimum lease payments | 137                            |
|                        | <u>137</u>                     |

#### 35.1.3 Non-cancellable operating lease commitments

|  | 31/12/13<br>kEUR |
|--|------------------|
| Not later than 1 year                        | 153              |
| Later than 1 year and not later than 5 years | 255              |
| Later than 5 years                           | -                |
|  | <u>408</u>       |

Furthermore, open purchase orders exist, amounting to kEUR 2,900.

Included in the lease obligation of the period 1 to 5 years is an obligation for office rent (The Hague). The term of the contract ends on February 28, 2017, however, there is an option for the lessee to end the contract per March 1, 2015 against a penalty equal to a half years' rent, equal to 32 kEUR. This option expires on September 1, 2014. In the year 2013, Management decided to keep the current office until the end of the contract without taking the option of early leave.

Regarding the rent of the building in The Hague, two bank guarantees of kEUR 16,2 and kEUR 29,3 exist.

## 36. Contingent liabilities

There are no contingent liabilities as of December 31, 2013.

## 37. Events after the reporting period

In January 2014 Tulip Oil Holding Middle East B.V. acquired 100% of the shares of Tulip Oil Oman B.V. from Tulip Oil Holding B.V. Furthermore capital contributions amounting to kEUR 14,500 have been made by the shareholders of the Company.

DE BRAUW  
BLACKSTONE  
WESTBROEK

De ondergetekende:

Mr Cindy Claudia Smid, kandidaat-notaris, als waarnemer van de met verlof afwezige Mr Drs Cornelis Johannes Groffen, notaris met plaats van vestiging te Amsterdam, verklaart over de statuten (de "**Statuten**") van de besloten vennootschap met beperkte aansprakelijkheid: **Tulip Oil Netherlands B.V.**, statutair gevestigd te 's-Gravenhage, voorheen genaamd: **Smart Energy Solutions B.V.**, voorheen statutair gevestigd te Amsterdam (de "**Venootschap**"), het volgende:

- (i) de Statuten luiden overeenkomstig de aan deze verklaring gehechte tekst;
- (ii) de Statuten zijn voor het laatst gewijzigd bij akte (de "**Akte**"), verleden voor een waarnemer van Mr Drs C.J. Groffen, notaris te Amsterdam, op 8 juni 2012.

Ik, Mr C.C. Smid, waarnemer, heb mij bij het afgeven van de hiervoor onder (i) en (ii) opgenomen verklaringen uitsluitend gebaseerd op de gegevens die zijn vermeld in het uittreksel uit het handelsregister van de inschrijving van de Venootschap en een afschrift van de Akte.

Getekend te Amsterdam op 8 juni 2012.

A large, handwritten signature in black ink, consisting of several loops and swirls, is placed next to the notary stamp.

## STATUTEN

van:

Tulip Oil Netherlands B.V.  
statutair gevestigd te 's-Gravenhage  
d.d. 8 juni 2012

### Definities.

#### Artikel 1.

1.1. In deze statuten wordt verstaan onder:

- aandeel: een aandeel in het kapitaal van de vennootschap;
- aandeelhouder: een houder van één of meer aandelen;
- algemene vergadering of algemene vergadering van aandeelhouders: het vennootschapsorgaan dat wordt gevormd door de aandeelhouders dan wel een bijeenkomst van aandeelhouders (of hun vertegenwoordigers) en andere personen met vergaderrechten;
- directie: het orgaan gevormd door de directeur(en);
- directeur(en): de bestuurder(s) in de zin van de wet;
- orgaan: de directie of de algemene vergadering;
- schriftelijk: bij brief, fax of e mail, of bij boodschap die via een ander gangbaar communicatiemiddel wordt overgebracht en op schrift kan worden ontvangen;
- uitkeerbare eigen vermogen: het deel van het eigen vermogen van de vennootschap, dat het geplaatste kapitaal vermeerderd met de reserves die krachtens de wet moeten worden aangehouden, te boven gaat;
- vennootschap: de vennootschap waarvan de interne organisatie wordt beheerst door deze statuten.

1.2. Verwijzingen naar artikelen zijn verwijzingen naar artikelen van deze statuten tenzij uitdrukkelijk anders aangegeven.

### Naam en zetel.

#### Artikel 2.

2.1. De vennootschap draagt de naam:

**Tulip Oil Netherlands B.V.**

2.2. De vennootschap heeft haar zetel te 's-Gravenhage.

### Doel.

#### Artikel 3.

3.1. De vennootschap heeft ten doel:

- het uitvoeren van werkzaamheden ten behoeve van het winnen van koolwaterstoffen en/of het opwekken van energie op het land zowel als op zee en alle daarmee samenhangende dienstverlening;
  - het oprichten van-, het deelnemen in- en het financieren van vennootschappen, bedrijven en andere ondernemingen;
  - het samenwerken met-, het voeren van directie over- en het verlenen van adviezen en andere diensten aan vennootschappen of ondernemingen;
  - het opnemen van gelden, het aantrekken van gelden, hetzij in het openbaar, hetzij onderhands door het uitgeven van obligaties of andere waardepapieren en in het algemeen het afsluiten van financiële transacties;
  - het verstrekken van zekerheden voor schulden en andere verplichtingen van de vennootschap of andere vennootschappen of ondernemingen die met haar in een groep verbonden zijn of van derden;
  - het verkrijgen, bezitten, vervreemden, bezwaren, exploiteren, leasen, (ver)huren, alsmede de ontwikkeling van (register)goederen;
  - het verkrijgen, exploiteren en vervreemden van industriële en intellectuele eigendomsrechten, met inbegrip van onder meer handelsmerken, auteursrechten, licenties, octrooien, modellen, geheime procedés, recepten en patenten, alsook het daaruit verwerven van royalty's en andere opbrengsten,
- alsmede het verrichten van al hetgeen met het vorenstaande verband houdt of daartoe bevorderlijk kan zijn, alles in de ruimste zin van het woord.

#### Kapitaal en aandelen.

##### Artikel 4.

- 4.1. Het maatschappelijk kapitaal bedraagt vijfhonderdduizend euro (EUR 500.000,--) en is verdeeld in vijf duizend (5.000) aandelen van nominaal éénhonderd euro (EUR 100,--).
- 4.2. De aandelen luiden op naam en zijn doorlopend genummerd van 1 af.
- 4.3. Door de vennootschap worden geen aandeelbewijzen afgegeven.

#### Uitgifte.

##### Artikel 5.

- 5.1. Uitgifte van aandelen geschiedt krachtens een besluit van de algemene vergadering dat tevens de koers en de verdere voorwaarden van uitgifte bevat.  
De koers van uitgifte mag niet beneden pari zijn.
- 5.2. De algemene vergadering kan haar bevoegdheid als in het vorige lid bedoeld overdragen aan een ander orgaan en kan deze overdracht herroepen.
- 5.3. Voor uitgifte van een aandeel is voorts vereist een daartoe bestemde ten overstaan van een in Nederland standplaats hebbende notaris verleden akte waarbij de betrokkenen partij zijn.
- 5.4. Bij uitgifte van aandelen heeft iedere aandeelhouder een voorkeursrecht naar evenredigheid van het gezamenlijk bedrag van zijn aandelen behoudens het bepaalde in de wet.  
Het voorkeursrecht is niet overdraagbaar.  
Het voorkeursrecht kan, telkens voor een enkele uitgifte van aandelen, worden beperkt of uitgesloten bij besluit van de algemene vergadering.

- 5.5. Het in de vorige leden van dit artikel bepaalde is van overeenkomstige toepassing op het verlenen van rechten tot het nemen van aandelen.

#### Eigen aandelen.

##### Artikel 6.

- 6.1. De vennootschap kan bij uitgifte van aandelen geen eigen aandelen nemen.
- 6.2. Verkrijging door de vennootschap van niet volgestorte eigen aandelen is nietig, tenzij wordt verkregen onder algemene titel.
- 6.3. De vennootschap mag volgestorte eigen aandelen slechts verkrijgen om niet of met inachtneming van het bepaalde in de wet.
- 6.4. Met betrekking tot vervreemding van door de vennootschap gehouden eigen aandelen is het bepaalde in de blokkeringsregeling in deze statuten van toepassing.
- 6.5. Onder aandelen in dit artikel zijn certificaten daarvan begrepen.

#### Financiële steunverlening.

##### Artikel 7.

- 7.1. De vennootschap mag niet, met het oog op het nemen of verkrijgen van aandelen in haar kapitaal of van certificaten daarvan, zekerheid stellen, een koersgarantie geven, zich op andere wijze sterk maken of zich hoofdelijk of anderszins naast of voor anderen verbinden.
- 7.2. Leningen met het oog op het nemen of verkrijgen van aandelen in haar kapitaal of van certificaten daarvan, mag de vennootschap slechts verstrekken tot ten hoogste het bedrag van de uitkeerbare reserves.
- 7.3. De vennootschap houdt een niet uitkeerbare reserve aan tot het uitstaande bedrag van de in het vorige lid genoemde leningen.

#### Kapitaalvermindering.

##### Artikel 8.

- 8.1. De algemene vergadering kan besluiten tot vermindering van het geplaatste kapitaal door intrekking van aandelen of door het bedrag van de aandelen bij statutenwijziging te verminderen.
- 8.2. Op een dergelijk besluit en de uitvoering daarvan is het bepaalde in de wet van toepassing.

#### Certificering, verpanding en vestiging van vruchtgebruik op aandelen.

##### Artikel 9.

- 9.1. De vennootschap verleent geen medewerking aan uitgifte van certificaten van aandelen van de vennootschap.
- 9.2. Op aandelen kan vruchtgebruik en pandrecht worden gevestigd.  
Aan de vruchtgebruiker en pandhouder van aandelen kan het stemrecht niet worden toegekend, tenzij het stemrecht toekomt aan een vruchtgebruiker op grond van artikel 2:197 lid 3 laatste volzin van het Burgerlijk Wetboek.

#### Aandeelhoudersregister.

##### Artikel 10.

- 10.1. De directie houdt een register waarin de namen en adressen van alle houders van aandelen zijn opgenomen met vermelding van de datum waarop zij de aandelen hebben verkregen, de datum van de erkenning of betekening, alsmede van het op ieder aandeel gestorte bedrag.

- Daarin worden tevens opgenomen de namen en adressen van hen die een recht van vruchtgebruik of pandrecht op aandelen hebben, met vermelding van de datum waarop zij het recht hebben verkregen alsmede de datum van erkenning of betekening.
- 10.2. Iedere aandeelhouder, vruchtgebruiker of pandhouder is verplicht er voor te zorgen dat zijn adres bij de vennootschap bekend is.
- 10.3. Het register wordt regelmatig bijgehouden overeenkomstig de bepalingen van de wet.
- 10.4. Alle aantekeningen in en afschriften of uittreksels uit het aandeelhoudersregister zullen worden ondertekend door een directeur.
- Blokkeringsregeling (aanbiedingsregeling).**
- Artikel 11.**
- 11.1. Overdracht van aandelen kan slechts geschieden nadat de aandeelhouder ("aanbieder") deze heeft aangeboden aan zijn mede-aandeelhouders, een en ander op de wijze als hierna bepaald.
- 11.2. Als aanbod geldt de mededeling van de aanbieder aan de directie van zijn voornemen tot vervreemding onder opgave van het aantal aandelen dat hij wenst over te dragen en - indien deze bekend is - van de naam van degene aan wie hij wenst over te dragen.
- 11.3. De directie brengt het aanbod alsmede de daarbij verstrekte gegevens binnen twee weken na ontvangst van de in het vorige lid bedoelde mededeling ter kennis van de overige aandeelhouders, gericht aan de adressen vermeld in het aandeelhoudersregister.
- 11.4. De aandeelhouder die één of meer van de aangeboden aandelen wenst te kopen geeft daarvan schriftelijk kennis aan de directie binnen drie weken na verzending van de in het vorige lid bedoelde mededeling.  
Indien zich binnen de in de vorige zin bedoelde periode geen gegadigde voor alle aangeboden aandelen heeft gemeld, geeft de directie daarvan onverwijd kennis aan de aanbieder.  
De vennootschap zelf kan slechts met instemming van de aanbieder als gegadigde optreden.  
Ingeval meer aandeelhouders gegadigde zijn voor meer aandelen dan zijn aangeboden, zal toewijzing door de directie geschieden naar evenredigheid van het aandelenbezit van de gegadigden.  
Is een aandeelhouder gegadigde voor minder aandelen dan hem naar bedoelde evenredigheid zouden toekomen dan worden de overige aangeboden aandelen aan de andere gegadigden naar bedoelde evenredigheid toegewezen.  
Voor zover toewijzing naar die maatstaf niet mogelijk is, zal loting beslissen.
- 11.5. Binnen twee weken na het verstrijken van de in het vorige lid bedoelde termijn stelt de directie de aanbieder in kennis van de uitkomst van de in dat lid bedoelde procedure.
- 11.6. De prijs van de aangeboden aandelen zal door partijen in onderling overleg worden vastgesteld.  
Indien partijen het niet eens worden over de prijs zal de prijs worden vastgesteld door één of meer onafhankelijke deskundigen die door de aanbieder en de gegadigden in gemeenschappelijk overleg zullen worden benoemd.  
Komen zij hieromtrent binnen één maand na de verzending van de in het vorige lid bedoelde kennisgeving niet tot overeenstemming, dan zal de meest gerede partij aan

- de voorzitter van de Kamer van Koophandel en Fabrieken voor het gebied waar de vennootschap haar zetel heeft de benoeming van drie onafhankelijke deskundigen verzoeken.
- De deskundigen zijn gerechtigd tot inzage van alle boeken en bescheiden van de vennootschap en tot het verkrijgen van alle inlichtingen, waarvan kennisneming voor hun waardering dienstig is.
- De door deskundigen binnen drie maanden na hun benoeming gezamenlijk vastgestelde prijs wordt ter kennis gebracht van de directie, die deze prijs onverwijd meedeelt aan de aanbieder en de gegadigde(n).
- 11.7. De aanbieder is bevoegd zijn aanbod in te trekken binnen één maand nadat hem de kennisgevingen omtrent gegadigde(n) en prijs zijn gedaan.
- Een gegadigde is bevoegd zich als zodanig terug te trekken binnen één maand nadat hem de kennisgeving omtrent de prijs is gedaan.
- Na terugtrekking van één of meer gegadigden vindt opnieuw toewijzing plaats als hiervoor bedoeld in lid 4, waarvan onverwijd aan de aanbieder wordt kennisgegeven.
- De aanbieder is bevoegd alsnog zijn aanbod in te trekken binnen één maand nadat hem de kennisgeving omtrent de tweede toewijzing is gedaan.
- 11.8. De gekochte aandelen moeten tegen gelijktijdige betaling van de prijs worden geleverd binnen één maand na het verstrijken van de termijn, gedurende welke het aanbod kan worden ingetrokken.
- 11.9. De aanbieder, die zijn aanbod niet heeft ingetrokken, kan de aangeboden aandelen vrijelijk overdragen binnen drie maanden, nadat hem overeenkomstig het vorenstaande is medegedeeld dat van het aanbod geen of niet volledig gebruik is gemaakt.
- 11.10. De kosten van de benoeming van de in lid 6 bedoelde deskundigen en hun honorarium komen ten laste van:
- a. de aanbieder, indien deze zijn aanbod intrekt;
  - b. de gegadigde, indien deze zich terugtrekt en dientengevolge de aanbieder vrij is;
  - c. de aanbieder voor de helft en de kopers voor de helft, indien de aandelen door aandeelhouders zijn gekocht, met dien verstande dat iedere koper in de kosten bijdraagt in verhouding tot het aantal door hem gekochte aandelen.
- 11.11. Indien en voor zover een aandeelhouder enige verplichting ingevolge dit artikel niet tijdig nakomt, is de vennootschap onherroepelijk gemachtigd namens deze aandeelhouder alle hiervoor omschreven verplichtingen na te komen.
- De vennootschap zal van de volmacht, voor zover betrekking hebbende op de overdracht, geen gebruik maken dan nadat de verschuldigde prijs ten behoeve van de aanbieder aan de vennootschap is betaald.
- 11.12. Het aan de aandelen verbonden vergader- en stemrecht kan niet worden uitgeoefend en het aan de aandelen verbonden recht op uitkering wordt opgeschorst, gedurende de periode, waarin de aanbieder enige op hem ingevolge het vorenstaande rustende verplichting niet nakomt.
- 11.13. Alle kennisgevingen en mededelingen krachtens dit artikel en artikel 12 geschieden bij aangetekend schrijven.
- 11.14. Voor de toepassing van dit artikel wordt onder aandelen tevens begrepen het recht tot het nemen van aandelen.

11.15. Het in dit artikel bepaalde geldt niet:

- a. indien de aandeelhouder krachtens de wet tot overdracht van zijn aandeel aan een eerdere aandeelhouder verplicht is;
- b. indien de overdracht geschiedt binnen drie maanden na schriftelijke toestemming van alle aandeelhouders.

#### Verplichte aanbieding.

##### Artikel 12.

12.1. In geval van:

- verkrijging van aandelen krachtens juridische fusie of splitsing, tenzij ten gevolge daarvan geen wijziging optreedt in de zeggenschap als bedoeld in het "S.E.R.-besluit Fusiegedragsregels 2000", ongeacht of dit van toepassing is;
- faillissement van- of verlening van surs-éance van betaling aan een aandeelhouder;
- wijziging van de zeggenschap in een aandeelhouder-rechtspersoon als bedoeld in het "S.E.R.-besluit Fusiegedragsregels 2000", ongeacht of dit van toepassing is;
- ontbinding van een aandeelhouder die een of meer aandelen houdt zijnde een juridische entiteit, vennootschap onder firma, commanditaire vennootschap of een andere soort vennootschap,

moeten de betreffende aandelen respectievelijk alle aandelen van de betreffende aandeelhouder te koop worden aangeboden aan de mede-aandeelhouders.

12.2. Uiterlijk dertig dagen nadat een in lid 1 bedoeld geval zich voordoet moet(en) de betreffende aandeelhouder(s) mededeling daarvan doen aan de directie.

12.3. De verplichting tot aanbieding bestaat niet in geval van een juridische fusie als bedoeld in artikel 2:333 van het Burgerlijk Wetboek.

12.4. Het bepaalde in het vorige artikel is voor zover mogelijk van overeenkomstige toepassing, met dien verstande dat de aanbieder niet bevoegd is zijn aanbod in te trekken en dat, indien blijkt dat er onder de overige aandeelhouders geen of onvoldoende gegadigden zijn om alle aangeboden aandelen tegen contante betaling te kopen, de aanbieder alsdan niet bevoegd is de betreffende aandelen vrijelijk over te dragen en de betreffende aandelen kan behouden.

12.5. Voor de toepassing van dit artikel wordt onder aandelen tevens begrepen het recht tot het nemen van aandelen.

#### Levering van aandelen.

##### Artikel 13.

13.1. Voor de uitgifte en levering van een aandeel of de levering of afstanddoening van een beperkt recht daarop is vereist een daartoe bestemde ten overstaan van een in Nederland gevestigde notaris verleden akte, waarbij de betrokkenen partij zijn.

13.2. De levering van een aandeel of de levering of afstanddoening van een beperkt recht daarop overeenkomstig het in lid 1 bepaalde werkt mede van rechtswege tegenover de vennootschap.

Behoudens in het geval dat de vennootschap zelf bij de rechtshandeling partij is, kunnen de aan het aandeel verbonden rechten eerst worden uitgeoefend nadat zij de

rechtsactie heeft erkend of de akte aan haar is betekend overeenkomstig het daaromtrent bepaalde in de wet.

#### Directie.

##### Artikel 14.

- 14.1. De vennootschap heeft een directie. Het aantal directeuren wordt door de algemene vergadering vastgesteld.
- 14.2. Directeuren worden benoemd door de algemene vergadering.
- 14.3. Directeuren kunnen te allen tijde door de algemene vergadering worden geschorst of ontslagen.
- 14.4. Een schorsing kan, ook na één of meermalen verlengd te zijn, in totaal niet langer duren dan drie maanden.
- 14.5. De bezoldiging en verdere arbeidsvoorraarden worden, voor iedere directeur afzonderlijk, bepaald door de algemene vergadering.

#### Besluitvorming directie.

##### Artikel 15.

- 15.1. De directie besluit bij volstrekte meerderheid van de uitgebrachte stemmen in een vergadering van de directie, zonder dat een quorum is vereist.
- 15.2. In de vergaderingen van de directie brengt iedere directeur één stem uit.
- 15.3. Iedere directeur kan zich in de directievergaderingen uitsluitend door een mede-directeur doen vertegenwoordigen.  
Die vertegenwoordiging dient te geschieden krachtens een schriftelijke volmacht.
- 15.4. Directeuren kunnen ook deelnemen aan directievergaderingen per telefoon, per fax, per e-mail en enig ander elektronisch communicatiemiddel.
- 15.5. Besluiten van de directie kunnen ook buiten vergadering schriftelijk worden genomen, mits het desbetreffende voorstel aan alle in functie zijnde directeuren is voorgelegd en geen van hen zich tegen deze wijze van besluitvorming verzet. Schriftelijke besluitvorming geschieft door middel van schriftelijke verklaringen van alle in functie zijnde directeuren.
- 15.6. Besluiten van de directie worden genoteerd in een notulenboek dat door de directie wordt gehouden.
- 15.7. De directie kan nadere regels vaststellen omtrent de besluitvorming en werkwijze van de directie. In dat kader kan de directie onder meer bepalen met welke taak iedere directeur meer in het bijzonder zal zijn belast. De algemene vergadering kan bepalen dat deze regels en taakverdeling schriftelijk moeten worden vastgelegd en deze regels en taakverdeling aan haar goedkeuring onderwerpen.

#### Aanwijzingen, goedkeuring directiebesluiten.

##### Artikel 16.

- 16.1. De directie moet zich gedragen naar de aanwijzingen betreffende de algemene lijnen van het te volgen financiële, sociale en economische beleid en van het personeelsbeleid, te geven door de algemene vergadering.
- 16.2. De algemene vergadering is bevoegd besluiten van de directie aan haar goedkeuring te onderwerpen. Deze besluiten dienen duidelijk te worden omschreven en schriftelijk aan de directie te worden meegegeeld. Onder deze besluiten kunnen begrepen zijn

- besluiten van de directie omtrent de wijze van uitoefening van stemrecht door de vennootschap in organen van (andere) rechtspersonen en vennootschappen.**
- 16.3. **Het ontbreken van de goedkeuring van de algemene vergadering zoals bedoeld in dit artikel tast de vertegenwoordigingsbevoegdheid van de directie of de directeuren niet aan.**

#### **Belet of ontstentenis.**

##### **Artikel 17.**

- 17.1. **In geval van ontstentenis of belet van een directeur zijn de overblijvende directeuren of is de overblijvende directeur tijdelijk met het besturen van de vennootschap belast. In geval van ontstentenis of belet van alle directeuren of van de enige directeur wordt de vennootschap tijdelijk bestuurd door één of meer personen die daartoe door de algemene vergadering worden benoemd.**

#### **Vertegenwoordiging.**

##### **Artikel 18.**

- 18.1. **De directie vertegenwoordigt de vennootschap, voor zover uit de wet niet anders voortvloeit. De bevoegdheid tot vertegenwoordiging komt uitsluitend toe aan:**
- **hetzij de directie;**
  - **hetzij iedere directeur.**
- 18.2. **De directie kan functionarissen met algemene of beperkte vertegenwoordigingsbevoegdheid aanstellen. Ieder van hen vertegenwoordigt de vennootschap met inachtneming van de begrenzing aan zijn bevoegdheid gesteld. De titulatuur van deze functionarissen wordt door de directie bepaald. Deze functionarissen kunnen worden ingeschreven in het Handelsregister, met vermelding van de omvang van hun vertegenwoordigingsbevoegdheid. De vertegenwoordigingsbevoegdheid van een aldus benoemde functionaris kan zich niet uitstrekken tot gevallen waarin de vennootschap een tegenstrijdig belang heeft met de desbetreffende functionaris of met één of meer directeuren.**
- 18.3. **In alle gevallen waarin de vennootschap een tegenstrijdig belang heeft met één of meer directeuren, blijft het bepaalde in het eerste lid van dit artikel onverkort van kracht tenzij de algemene vergadering één of meer andere personen heeft aangewezen om de vennootschap in het desbetreffende geval of in dergelijke gevallen te vertegenwoordigen. Een besluit van de directie tot het verrichten van een rechtshandeling die een tegenstrijdig belang met één of meer directeuren in privé betreft, is onderworpen aan de goedkeuring van de algemene vergadering, maar het ontbreken van zodanige goedkeuring tast de vertegenwoordigingsbevoegdheid van de directie of directeuren niet aan.**

#### **Boekjaar, jaarrekening, jaarverslag.**

##### **Artikel 19.**

- 19.1. **Het boekjaar van de vennootschap is gelijk aan het kalenderjaar.**
- 19.2. **Binnen vijf maanden na afloop van elk boekjaar, behoudens verlenging van deze termijn door de algemene vergadering met ten hoogste zes maanden op grond van bijzondere omstandigheden, wordt door de directie de jaarrekening (bestaande uit de balans en de winst- en verliesrekening met toelichting) opgemaakt. De jaarrekening wordt ondertekend door alle directeuren.**

Ontbreekt de ondertekening van één of meer van hen dan wordt daarvan onder opgaf van reden melding gemaakt.

Tenzij artikel 2:403 van het Burgerlijk Wetboek voor de vennootschap geldt, maakt de directie binnen vooroemde termijn een jaarverslag op.

- 19.3. Indien en voor zover het dienaangaande in de wet bepaalde op de vennootschap van toepassing is, zal door de algemene vergadering opdracht worden verleend aan een deskundige of organisatie van deskundigen als bedoeld in artikel 2:393 lid 1 van het Burgerlijk Wetboek teneinde de door de directie ontworpen jaarrekening alsmede - indien opgemaakt - het jaarverslag te onderzoeken en daarover verslag uit te brengen en een verklaring af te leggen.
- 19.4. De jaarrekening wordt vastgesteld door de algemene vergadering.
- 19.5. De vennootschap is verplicht tot openbaarmaking bij het handelsregister indien en voor zover de wet dit vereist.

#### Winstbestemming.

#### Artikel 20.

- 20.1. De winst die in een boekjaar is behaald, staat ter beschikking van de algemene vergadering. Indien de algemene vergadering niet voorafgaand aan of uiterlijk direct na het besluit tot vaststelling van de jaarrekening een besluit neemt tot bestemming van de winst, zal de winst worden gereserveerd.
- 20.2. Uitkering van winst geschiedt na de vaststelling van de jaarrekening waaruit blijkt dat zij geoordloofd is.
- 20.3. De algemene vergadering kan besluiten tot het doen van tussentijdse uitkeringen op aandelen en/of tot het doen van uitkeringen op aandelen ten laste van een reserve van de vennootschap. Ook de directie kan besluiten tot het doen van tussentijdse uitkeringen op aandelen.
- 20.4. Uitkeringen op aandelen zijn betaalbaar onmiddellijk na het besluit tot uitkering, tenzij in het besluit een ander tijdstip is vastgesteld.
- 20.5. De vennootschap kan aan de aandeelhouders en andere gerechtigden tot de voor uitkering vatbare winst slechts uitkeringen doen tot ten hoogste het bedrag van het uitkeerbare eigen vermogen.
- 20.6. Op door de vennootschap gehouden aandelen in haar kapitaal of certificaten daarvan vindt geen uitkering ten behoeve van de vennootschap plaats.
- 20.7. Bij de berekening van het bedrag van enige uitkering op aandelen, tellen de aandelen in haar kapitaal die de vennootschap houdt, niet mee.
- 20.8. De vordering tot uitkering verjaart door een tijdsverloop van vijf jaren te rekenen vanaf de dag van betaalbaarstelling.

#### Vergaderingen van aandeelhouders.

#### Artikel 21.

- 21.1. Jaarlijks, binnen zes maanden na afloop van het boekjaar wordt de jaarlijkse vergadering van aandeelhouders gehouden, tenzij de termijn als bedoeld in artikel 19.2 van deze statuten overeenkomstig het aldaar bepaalde is verlengd.
- 21.2. De agenda van deze jaarvergadering vermeldt onder meer de volgende onderwerpen:
  - de behandeling van het jaarverslag;
  - de vaststelling van de jaarrekening;

- het verlenen van decharge aan de directie voor het door haar in het afgelopen boekjaar gevoerde bestuur;
- het verlenen van een opdracht aan een deskundige als bedoeld in artikel 2:393 van het Burgerlijk Wetboek, voor zover wettelijk vereist;
- de taal waarin het eerstvolgende jaarverslag en de posten van de eerstvolgende jaarrekening worden gesteld.

### Oproeping, agenda en plaats van de vergaderingen.

#### Artikel 22.

- 22.1. De oproeping van aandeelhouders geschiedt door de directie of door een directeur ("oproeping") welke oproeping schriftelijk moet worden verzonden niet later dan op de vijftiende dag vóór die van de vergadering.
- 22.2. De oproeping vermeldt plaats, dag en uur van de vergadering alsmede de te behandelen onderwerpen.  
Oproepingsbrieven worden verzonden aan de adressen vermeld in het aandeelhoudersregister. De oproeping door middel van elektronische berichten wordt verzonden aan de adressen die door de aandeelhouders voor dit doel aan de vennootschap bekend zijn gemaakt.  
Wanneer één of meer oproeppingen, overeenkomstig het hiervoor bepaalde verzonden, hun bestemming niet bereiken, dan zal dit geen invloed uitoefenen op de geldigheid van de algemene vergadering van aandeelhouders en de daarin te nemen besluiten.
- 22.3. Een onderwerp, waarvan de behandeling schriftelijk is verzocht door één of meer houders van aandelen die alleen of gezamenlijk ten minste één procent (1%) van het geplaatste kapitaal vertegenwoordigen, wordt opgenomen in de oproeping of op dezelfde wijze aangekondigd indien de vennootschap het verzoek niet later dan op de dertigste dag voor die van de vergadering heeft ontvangen en mits geen zwaarwichtig belang van de vennootschap zich daartegen verzet.
- 22.4. De algemene vergadering van aandeelhouders wordt gehouden in de gemeente waar de vennootschap haar zetel heeft.

### Toegang tot de vergadering.

#### Artikel 23.

- 23.1. Iedere aandeelhouder is bevoegd, in persoon of bij schriftelijk gevoldmachtigde, de algemene vergadering van aandeelhouders bij te wonen en daarin het woord te voeren.
- 23.2. Iedere aandeelhouder is tevens bevoegd om door middel van een elektronisch communicatiemiddel aan de algemene vergadering van aandeelhouders deel te nemen en daarin het woord te voeren en het stemrecht uit te oefenen. Hiervoor is vereist dat de aandeelhouder via het elektronische communicatiemiddel kan worden geïdentificeerd, rechtstreeks kan kennisnemen van de verhandelingen ter vergadering en het stemrecht kan uitoefenen. Bovendien is vereist dat de aandeelhouder via het elektronische communicatiemiddel kan deelnemen aan de beraadslaging.
- 23.3. De directeur(en) heeft (hebben) als zodanig in de algemene vergadering van aandeelhouders een raadgevende stem.
- 23.4. Omrent toelating van andere personen tot de vergadering beslist de voorzitter van de vergadering.

### Voorzitter.

**Artikel 24.**

- 24.1. De algemene vergadering van aandeelhouders voorziet zelf in haar leiding.
- 24.2. De voorzitter van de vergadering wijst voor de vergadering een notulist aan.

**Notulen, aantekening van aandeelhoudersbesluiten.****Artikel 25.**

- 25.1. Van het verhandelde in een algemene vergadering van aandeelhouders worden notulen gehouden door de notulist van de vergadering. De notulen worden vastgesteld door de voorzitter en de notulist van de vergadering en ten blyke daarvan door hen ondertekend.
- 25.2. De voorzitter van de vergadering of degene die de vergadering heeft bijeengeroepen, kan bepalen dat van het verhandelde een notarieel proces-verbaal wordt opgemaakt. Het notarieel proces-verbaal wordt mede-ondertekend door de voorzitter van de vergadering.
- 25.3. De directie maakt aantekening van alle door de algemene vergadering genomen besluiten. Indien de directie niet ter vergadering is vertegenwoordigd, wordt door of namens de voorzitter van de vergadering een afschrift van de genomen besluiten zo spoedig mogelijk na de vergadering aan de directie verstrekt. De aantekeningen liggen ten kantore van de vennootschap ter inzage van de aandeelhouders. Aan ieder van hen wordt desgevraagd een afschrift van of uittreksel uit de aantekeningen verstrekt, tegen ten hoogste de kostprijs.

**Besluitvorming in vergadering.****Artikel 26.**

- 26.1. Om aan de stemmingen in de algemene vergadering van aandeelhouders te kunnen deelnemen, moeten de aandeelhouders, respectievelijk hun vertegenwoordiger, de presentielijst tekenen, onder vermelding van het aantal door ieder vertegenwoordigde aandelen.
- 26.2. Elk aandeel geeft recht op één stem.
- 26.3. Voor een aandeel dat toebehoort aan de vennootschap of aan een dochtermaatschappij daarvan kan in de algemene vergadering van aandeelhouders geen stem worden uitgebracht; evenmin voor een aandeel waarvan een van hen de certificaten houdt.
- 26.4. Bij de vaststelling in hoeverre de aandeelhouders stemmen, aanwezig of vertegenwoordigd zijn, of in hoeverre het aandelenkapitaal verschafft wordt of vertegenwoordigd is, wordt geen rekening gehouden met aandelen waarvan de wet bepaalt dat daarvoor geen stem kan worden uitgebracht.
- 26.5. De besluiten in de algemene vergadering van aandeelhouders worden genomen met volstrekte meerderheid van stemmen, zonder dat een quorum is vereist. Blanco stemmen gelden als niet uitgebracht.
- 26.6. Stemming in de algemene vergadering van aandeelhouders geschieft mondeling, tenzij de voorzitter van de vergadering anders bepaalt.
- 26.7. Bij staking van stemmen is het voorstel verworpen.
- 26.8. In een algemene vergadering van aandeelhouders, waarin het gehele geplaatste kapitaal vertegenwoordigd is, kunnen, mits met algemene stemmen, rechtsgeldige besluiten worden genomen ook al zijn de voorschriften met betrekking tot het oproepen en houden van vergaderingen niet in acht genomen.

**Besluitvorming buiten vergadering.**

**Artikel 27.**

- 27.1. Besluitvorming door aandeelhouders kan op andere wijze dan in een vergadering van aandeelhouders plaatsvinden doordat alle aandeelhouders zich schriftelijk vóór het voorstel hebben verklaard, en mits de directeur(en) de gelegenheid heeft (hebben) gehad raadgevende stem uit te brengen.
- 27.2. Iedere aandeelhouder is verplicht er voor zorg te dragen dat de aldus genomen besluiten zo spoedig mogelijk schriftelijk ter kennis van de directie worden gebracht.

**Fusie, splitsing, statutenwijziging, ontbinding.****Artikel 28.**

- 28.1. De algemene vergadering kan besluiten tot fusie, splitsing, wijziging van de statuten en tot ontbinding van de vennootschap.
- 28.2. Degenen, die een oproeping tot een algemene vergadering van aandeelhouders hebben gedaan, waarin een voorstel tot het nemen van een besluit tot statutenwijziging aan de orde zal worden gesteld, moeten tegelijkertijd met de oproeping een afschrift van het voorstel, waarin de voorgedragen wijziging woordelijk is opgenomen, ten kantore van de vennootschap neerleggen ter inzage van aandeelhouders tot de afloop van de vergadering.  
De aandeelhouders moeten in de gelegenheid worden gesteld van de dag van de nederlegging tot die van de algemene vergadering van aandeelhouders een afschrift van het voorstel, zoals in de vorige zin bedoeld, te verkrijgen.  
Deze afschriften worden kosteloos verstrekt.
- 28.3. Ingeval tot ontbinding van de vennootschap is besloten, geschiedt de vereffening door de directie, tenzij de algemene vergadering één of meer andere personen tot vereffenaar te benoemt.  
Bij het besluit tot ontbinding zal tevens de beloning worden bepaald door de vereffenaar of de vereffenaars gezamenlijk te genieten.
- 28.4. Tijdens de vereffening blijven de statuten zoveel mogelijk van kracht.
- 28.5. Het overschot na vereffening wordt aan aandeelhouders en andere rechthebbenden in verhouding tot ieders recht uitgekeerd.
- 28.6. Na afloop van de vereffening zullen de boeken en bescheiden van de ontbonden vennootschap gedurende zeven jaren blijven berusten onder de persoon, daartoe door de algemene vergadering te benoemen.

**Wijziging van gegevens**

*KvK-nummer*  
**37117836**

*Datum*  
**9 september 2014**

Geachte heer/mevrouw,

Wij hebben een opgave van een wijziging ingeschreven in het Handelsregister. Op het bijgevoegde 'overzicht van wijzigingen' kunt u zien wat er is veranderd.

Als u meent dat deze wijziging in het Handelsregister onjuist is geregistreerd, kunt u bij ons bezwaar aantekenen. De termijn daarvoor is zes weken. Deze termijn vangt aan op de dag na dagtekening van deze brief.

Het Handelsregister kunt u online raadplegen. Op [www.kvk.nl](http://www.kvk.nl) vindt u hierover alle informatie. U vindt daar ook de vele producten en diensten van de Kamer van Koophandel zoals het aanbod van bijeenkomsten, seminars enz.

Als er in de toekomst gegevens wijzigen dan moet u deze binnen één week na de wijziging aan ons doorgeven. Hiervoor kunt u formulieren downloaden via [www.kvk.nl/formulieren](http://www.kvk.nl/formulieren).

Met vriendelijke groet,  
Kamer van Koophandel
