Electric Vehicles Statistics in the Netherlands

Up to and including March 2021 | Last update: April 20, 2021

This publication is made by the EV Monitor Team at **Netherlands Enterprise Agency**,
on the authority of the [Ministry of Infrastructure and Water Management](#).

If you would like a notification when a new version is available, please send an email to [elektrischrijden\[at\]rvo.nl](mailto:elektrischrijden[at]rvo.nl)

If you share content from this publication, please state the source: Netherlands Enterprise Agency (RVO.nl)

Summary of Dutch EV statistics as of 28 feb. 2021

March 2021

BEV (Battery Electric Vehicle)

- The number of BEV passenger cars in the fleet increased to 177,763 (+2,962 / +1.7% Month-over-Month).
- The number of new sales of BEV passenger cars was 2,107, representing a monthly sales market share of 9.2%.
- BEV passenger car new sales top 3 in this month: Tesla Model 3, Volkswagen ID.4, BMW iX3.

FCEV (Fuel-Cell Electric Vehicle)

- The number of FCEV passenger cars in the fleet increased to 390 (+20 / +5.4% MoM).

PHEV (Plugin-Hybrid Electric Vehicle)

- The number of PHEV passenger cars in the fleet increased to 110.027 (+4,712 / +4.5% MoM)
- The number of new sales of PHEV passenger cars was 2,638, representing a monthly sales market share of 11.6%.

Charging Points (as EVSEs)

- The total number of regular charging point increased to 72,729 (+3,873 / 5.6% MoM), for public and semi-public combined.

Source: Dutch Road Authority (RDW) and Eco-Movement B.V., edited by Netherlands Enterprise Agency (RVO.nl). **Vehicle fleet:** the cumulative registrations on balance. The increase is due to new registrations, used import and transfers from stock-in-trade to car owners. Decrease is due to export, theft, et cetera. **New registrations:** the sales of brand-new vehicles, stock-in-trade excluded. PHEV excludes hybrid electric vehicles (HEV).

Dutch ambition and realization - electric passenger cars

The table below shows the ambitions of the Dutch government towards zero-emission mobility for passenger cars in terms of new sales of passenger cars. New sales only include the sale of brand-new vehicles, used imports and sales to stock-in-trade are excluded.

BEV = Battery Electric Vehicle, **FCEV** = Fuel Cell Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

Ambition					
2020	10% of all new passenger cars sold will have an electric powertrain and a plug ¹ .				
2025	50% of all new passenger cars sold will have an electric powertrain and a plug. At least 30% of these vehicles (15% of the total) will be zero emission (BEV or FCEV) ¹ .				
2030	100% of all new passenger cars sold will be zero emission ² .				
Realization: EVs as percentage of new passenger car sales					
	All EVs (BEV, FCEV, PHEV)	Zero-emission (BEV, FCEV)	BEV	FCEV	PHEV
2015	9.6%	0.8%	0.8%	0.0%	8.8%
2016	5.8%	1.1%	1.1%	0.0%	4.7%
2017	2.2%	1.9%	2.0%	0.0%	0.3%
2018	6.3%	5.5%	5.5%	0.0%	0.8%
2019	14.9%	13.7%	13.7%	0.03%	1.1%
2020	24.8%	20.5%	20.5%	0.04%	4.3%
2021 (YtD, Jan-Mar.)	15.2%	5.3%	5.3%	0.03%	9.9%

Stock-in-trade cars excluded. The increase is due to new registrations, used import and transfers from stock-in-trade to car owners. Decrease is due to export, demolition, theft, et cetera. PHEV excludes hybrid electric vehicles (HEV).

Electric Vehicle Statistics in The Netherlands – data up to and including March, 2021

Fleet: Segments of BEV and PHEV passenger cars

Provided is a visualisation of various segments within the Battery Electric Vehicle (BEV) and Plug-in Hybrid Electric Vehicle (PHEV) passenger car fleet in the Netherlands. **Note:** The Fuel Cell Electric Vehicle (FCEV) models available on the market are segment D.

Segment legend: **A (mini):** city cars | **B (small):** supermini cars | **C (medium):** small family cars | **D (large):** large family cars | **E (executive):** executive + luxury cars

BEV passenger car fleet per segment

PHEV passenger car fleet per segment

Source: Dutch Road Authority (RDW), edited by Netherlands Enterprise Agency (RVO.nl). The numbers represent the **vehicle fleet**, the cumulative registrations on balance. Stock-in-trade cars excluded. The increase is due to new registrations, used import and transfers from stock-in-trade to car owners. Decrease is due to export, demolition, theft, et cetera. PHEV excludes hybrid electric vehicles (HEV).

Fleet: Top 10 BEV and PHEV passenger car models

The graphs below visualize the top 10 most common registered EV passenger cars (M1) in the Netherlands as of **31 March 2021**.

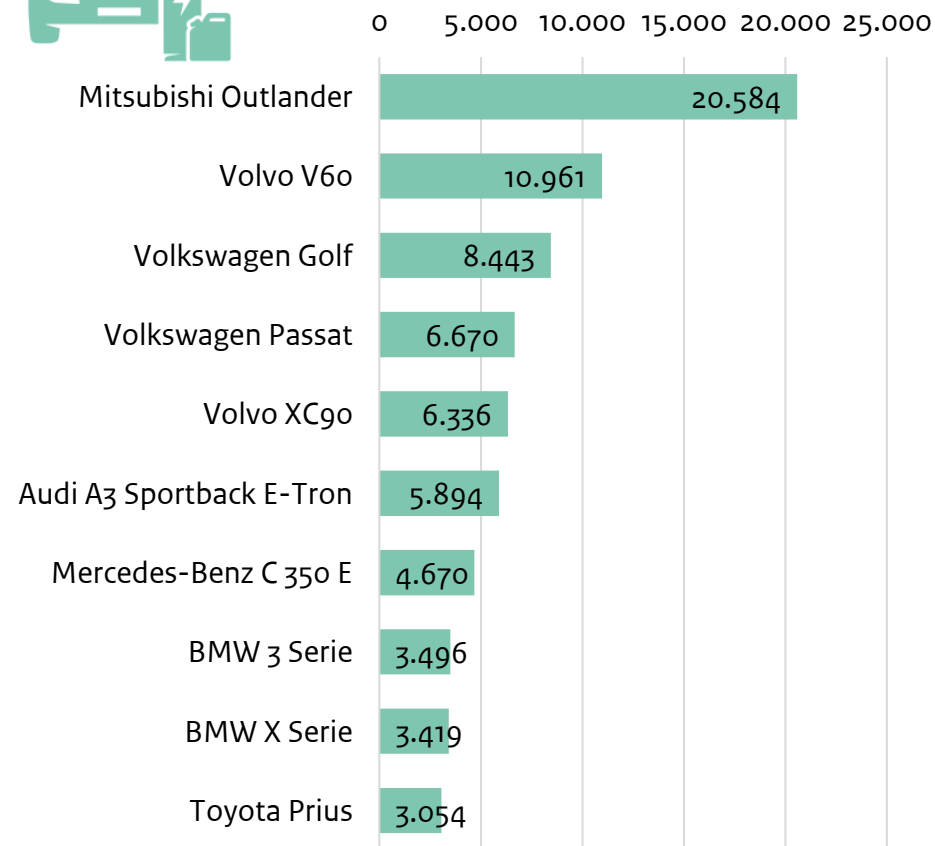

BEV = Battery Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

Number of BEV passenger cars in fleet

Number of PHEV passenger cars in fleet

Source: Dutch Road Authority (RDW), edited by Netherlands Enterprise Agency (RVO.nl). The numbers represent the **vehicle fleet**, the cumulative registrations on balance. Stock-in-trade cars excluded. The increase is due to new registrations, used import and transfers from stock-in-trade to car owners. Decrease is due to export, demolition, theft, et cetera. PHEV excludes hybrid electric vehicles (HEV).

Fleet: Number of cars in car sharing fleet

The table and graph below provide information about the state of car sharing in the Netherlands.

BEV = Battery Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

	2016	2017	2018	2019	2020
Shared cars (all fuels)	25,128	30,697	41,191	51,149	64,312
Shared cars (BEV + PHEV)	1,131	1,259	2,636	3,478	5,274
Share of electric cars (BEV + PHEV) in car-sharing fleet	4.5%	4.1%	6.4%	6.8%	8.2%
Share of battery electric cars (BEV) in car-sharing fleet	n.a.	n.a.	n.a.	n.a.	6.0%
Share of plug-in hybrid electric cars (PHEV) in car-sharing fleet	n.a.	n.a.	n.a.	n.a.	2.2%
People sharing cars	n.a.	n.a.	400,000	515,000	730,000

Source: CROW (2020) <https://www.crow.nl/dashboard-autodelen/home/monitor>, the statistics are updated once a year. PHEV excludes hybrid electric vehicles (HEV).

Fleet: Registered EV commercial vehicles (N1, N2+N3)

The table below shows the amount of registered electric commercial vans (N1) and trucks (N2+N3) in the Netherlands over time.

BEV = Battery Electric Vehicle, **FCEV** = Fuel Cell Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

Type of vehicle	Legend	31-12-2016	31-12-2017	31-12-2018	31-12-2019	31-12-2020	31-03-2021

More information about the Real Range method can be found on [this EV Database page](#).

Inflow and outflow of EV passenger cars

The table below shows the total inflow and outflow of electric passenger cars during the month of **March 2021**. Inflow excludes sales to stock-in-trade.

BEV = Battery Electric Vehicle, **FCEV** = Fuel Cell Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

Legend	M1: Passenger cars (EV)	M1: Passenger cars (BEV)	M1: Passenger cars (FCEV)	M1: Passenger cars (PHEV)
Total inflow this month	6.195	2.591	37	3.567
Inflow: new sales	4.766	2.107	21	2.683
Inflow: used import (≤90 days)	91	31	0	60
Inflow: used import (>90 days)	1.338	453	16	869
Total outflow this month	1.080	215	0	865
Outflow: export	1.062	207	0	855
Outflow: other	18	8	0	10
Net inflow this month	5.115	2.376	37	2.702

Source: Dutch Road Authority (RDW), edited by Netherlands Enterprise Agency (RVO.nl). The **inflow** statistics excludes sales to stock-in-trade, whilst **outflow** includes cars from stock-in-trade. The Other category of outflow is the sum of elimination by demolition, theft, a change of license plate, etc. PHEV excludes hybrid electric vehicles (HEV). EV includes the sum of BEV, FCEV and PHEV.

Inflow: New sales of EV passenger cars

The table below shows the amount of newly sold electric passenger cars (M1) in the Netherlands over time. New sales only include the sale of brand-new vehicles, used imports and sales to stock-in-trade are excluded.

BEV = Battery Electric Vehicle, **FCEV** = Fuel Cell Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

Type of vehicle	Legend	2016	2017	2018	2019	2020	March. 2021
M1: Passenger cars (all drivetrains / fuels)	Total sales	379,697	412,442	444,224	444,872	351,847	22.823
	Total share	100%	100%	100%	100%	100%	100%

M1: Passenger cars (BEV)	Units sold	4,016	7,996	24,330	60,934	72,163	2.107
	Share of total	1.06%	1.94%	5.48%	13.70%	20.51%	9.23%
M1: Passenger cars (FCEV)	Units sold	7	5	13	155	146	21
	Share of total	0.00%	0.00%	0.00%	0.00%	0.00%	0.09%
M1: Passenger cars (PHEV)	Units sold	18,028	1,057	3,475	5,094	15,028	2.638
	Share of total	4.75%	0.26%	0.78%	1.15%	4.27%	11.56%

Source: Dutch Road Authority (RDW), edited by Netherlands Enterprise Agency (RVO.nl). This table shows the number of **new sales**: used imports and sales to stock-in-trade are excluded. These numbers are not on balance / not corrected for elimination by export, demolition, theft, et cetera. PHEV excludes hybrid electric vehicles (HEV). EV includes the sum of BEV, FCEV and PHEV.

Inflow: New sales of EV passenger cars

The graph below visualizes the amount of newly sold electric passenger cars (M1) in the Netherlands per month. New sales only include the sale of brand-new vehicles, used imports and sales to stock-in-trade are excluded.

BEV = Battery Electric Vehicle, **FCEV** = Fuel Cell Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

■ Brand new FCEV passenger cars ■ Brand new PHEV passenger cars ■ Brand new BEV passenger cars

Source: Dutch Road Authority (RDW), edited by Netherlands Enterprise Agency (RVO.nl). This graph shows the number of **new sales**: used imports and sales to stock-in-trade cars are excluded. These numbers are not on balance / not corrected for elimination by export, demolition, theft, et cetera. PHEV excludes hybrid electric vehicles (HEV).

Electric Vehicle Statistics in The Netherlands – data up to and including March, 2021

Inflow: New sales, market share EV passenger cars

The graph below visualizes the monthly market share of electric passenger cars (M1) as a percentage of all new sales of passenger cars (M1) in the Netherlands. New sales only include the sale of brand-new vehicles, used imports and sales to stock-in-trade are excluded.

BEV = Battery Electric Vehicle, **FCEV** = Fuel Cell Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

■ Brand new FCEV passenger cars ■ Brand new PHEV passenger cars ■ Brand new BEV passenger cars

Source: Dutch Road Authority (RDW), edited by Netherlands Enterprise Agency (RVO.nl). This graph shows the number of **new sales**: used imports and sales to trade stock are excluded. These numbers are not on balance / not corrected for elimination by export, demolition, theft, et cetera. PHEV excludes hybrid electric vehicles (HEV).

Inflow: New sales, segments of BEV and PHEV passenger cars

The graphs below visualizes the segments of newly sold electric passenger cars (M1) in the Netherlands over time. New sales only include the sale of brand-new vehicles, used imports and sales to stock-in-trade are excluded.

Segment legend: **A (mini):** city cars | **B (small):** supermini cars | **C (medium):** small family cars | **D (large):** large family cars | **E (executive):** executive + luxury cars

New sales of BEV passenger cars per segment

New sales of PHEV passenger cars per segment

Source: Dutch Road Authority (RDW), edited by Netherlands Enterprise Agency (RVO.nl). These graphs show the number of **new sales**: used imports and sales to stock-in-trade are excluded. These numbers are not on balance / not corrected for elimination by export, demolition, theft, et cetera. PHEV excludes hybrid electric vehicles (HEV).

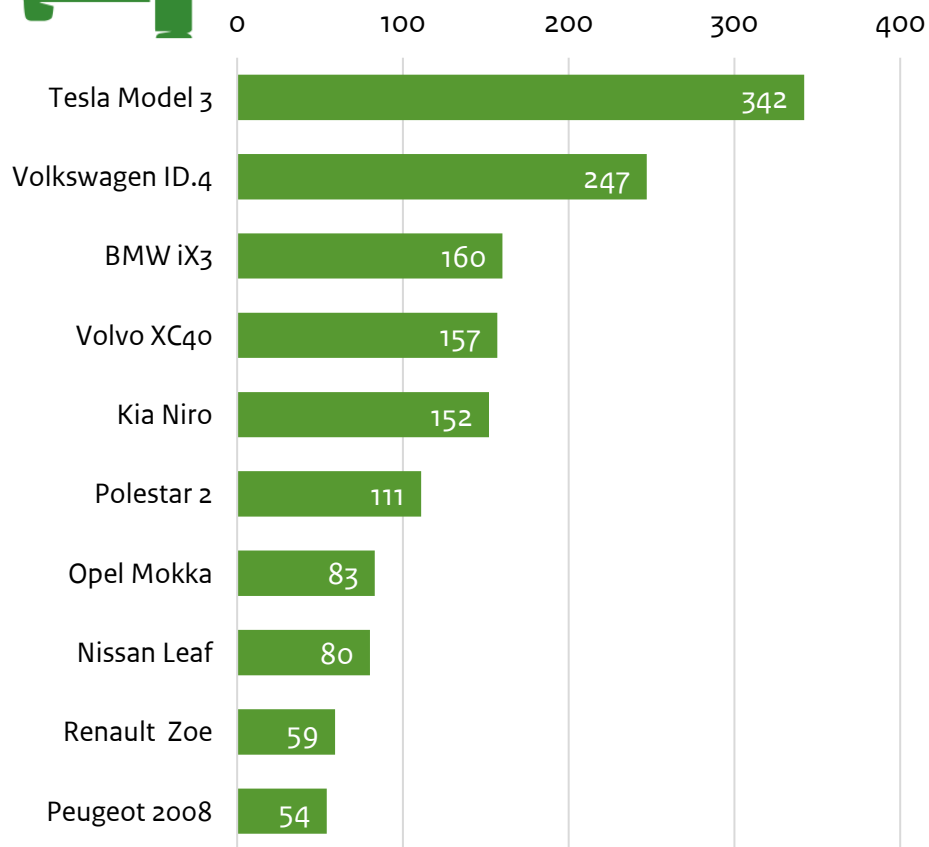

Inflow: New sales, top 10 BEV and PHEV passenger cars

The graphs below visualizes the new sales of the top 10 most popular electric passenger cars (M1) in the Netherlands during **March 2021**. New sales only include the sale of brand-new vehicles, used imports and sales to stock-in-trade are excluded.

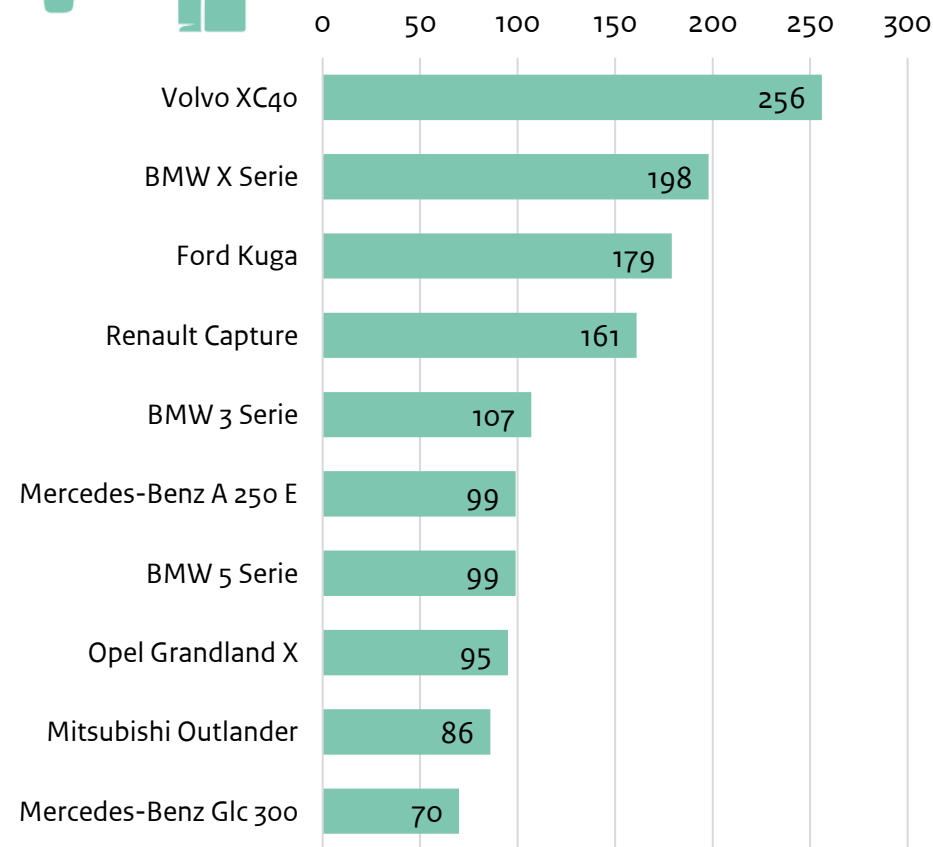

BEV = Battery Electric Vehicle, **PHEV** = Plug-in Hybrid Electric Vehicle

New sales of BEV passenger cars

New sales of PHEV passenger cars

These numbers are not on balance / not corrected for elimination by export, demolition, theft, et cetera. PHEV excludes hybrid electric vehicles (HEV).

EV charging infrastructure: Number of charging points in NL

The graph below shows the total amount of charging points (EVSEs) for electric vehicles in the Netherlands. **Regular** charging points are ≤22kW capacity, while **fast** charging points are >22kW.

The [website of the National Agenda Laadinfrastructuur \(NAL\)](#) has more details, including statistics on provincial and municipality aggregation levels (in Dutch).

Electric Vehicle Statistics in The Netherlands – data up to and including March, 2021

EV charging infrastructure: Number of charging points in NL

The table below shows the total amount of charging points (EVSEs) for electric vehicles in the Netherlands.

Regular charging points are ≤22kW capacity, while **fast** charging points are >22kW.

The [website of the National Agenda Laadinfrastructuur \(NAL\)](#) has more details, including statistics on provincial and municipality aggregation levels (in Dutch).

Number of charging points at the end of	2016	2017	2018	2019	2020	Mar. 2021
Regular public + semi-public	26,088	32,875	35,861	49,520	63,586	72,729
Regular public (24/7 publicly accessible)	11,768	15,288	20,228	27,773	39,968	43,803
Regular semi-public (limited publicly accessible)	14,320	17,587	15,633	21,747	23,618	28,926
- of which Destination chargers (eg located near supermarkets)					6,528	7,650
- of which Work chargers (eg located near offices)					17,081	21,268
Fast charging points, public + semi-public	612	755	1,116	1,262	2,027	2,109
- of which >100 kW				433	897	1,041
Fast charging locations	148	178	197	339	467	509
All regular + fast charging points	26,700	33,630	36,977	50,772	65,613	74,838
Number of plug-in passenger car (BEV + PHEV) per charging point	4,1	3,5	3,7	3,9	4,2	3,8
Private charging points ¹	~63,000	~68,000	~80,000	~114,000	~158,000	~167,000

Source: Eco-Movement, edited by Netherlands Enterprise Agency (RVO.nl)

¹The number of private charging points is an estimation based on private charging point ownership statistics from the [Nationaal Laadonderzoek 2020](#)

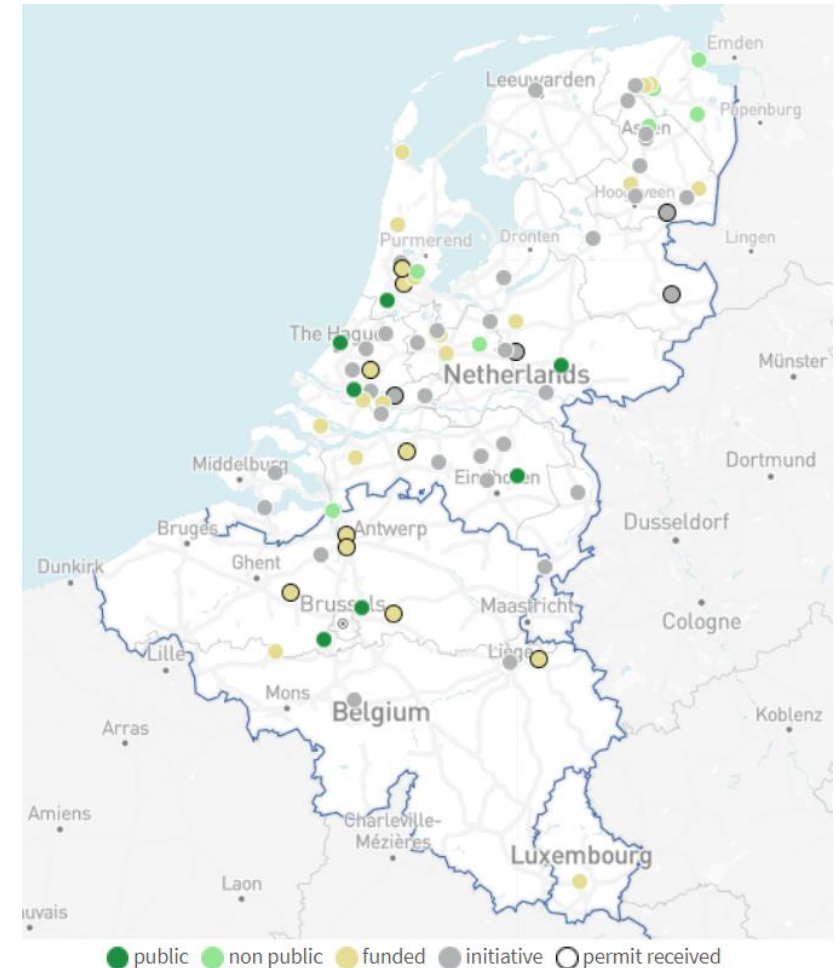

EV charging infrastructure: Public hydrogen stations

The table below shows the hydrogen fueling stations that are publicly accessible in the Netherlands.

The [website of H2 BeNeLux](#) has more details, including information about stations that are in development.

Location	Company	Capacity (bar)
Arnhem	Pitpoint	350 + 700
Den Haag (The Hague)	Kerkhof & Zn	350 + 700
Helmond	Waterstofnet	350 + 700
Hoofddorp	Shell	700
Rhoon	Air Liquide	350 + 700

Electric Vehicles Statistics in the Netherlands

Note: some of the numbers in this new version of the monthly EV statistics are different than statistics published in the old format.

This is due to an improved methodology and new data insights, including the decision to exclude trade stock from fleet and sales statistics.

If you would like a notification when a new version is available, please send an email to [elektrischrijden\[at\]rvo.nl](mailto:elektrischrijden[at]rvo.nl)

If you share content from this publication, please state the source: Netherlands Enterprise Agency (RVO.nl)
